

Visual Safeguard

Absolute privacy for your most sensitive data

Protect your data from unauthorized access, corruption, ransomware, and theft with the power of **Visual Cryptography**. No passwords, no hardware, no software agents, just a **simple image**. Ensure data **confidentiality**, integrity, and availability while enjoying the most user-friendly experience.

Key Benefits

Absolute **privacy** of your data by using images.

Empower **teams** with effortless and secure **data sharing**.

Top-tier security powered by advanced **quantum-resistant** cryptography.

Web access or seamless **API** integration.

How it works

1. Access the platform (via web browser or via API).
2. Provide the info you want to protect and/or share.
3. Select an image of your choice to encrypt the info.

What can you do

- Backup sensitive information such as master recovery keys, disaster recovery plans, intellectual property, etc.
- Securely share confidential data internally and externally.
- Backup your wallets.
