

Antonela Bertero

Specialist Consultant in Foreign Trade and International Logistics

Professional Profile

With a solid track record in foreign trade and international logistics, I specialize in developing and implementing strategies for business expansion in global markets.

I work alongside my clients in improving their international operations, ensuring the efficiency of all processes involved.

My objective is to provide tailored solutions that allow them to operate successfully in a highly competitive environment.

Tailor-Made Strategies for Successful International Trade

International trade presents unique challenges for each organization. Therefore, I provide tailored advisory services aligned with each client's operational reality and strategic objectives.

Through a comprehensive analysis, I develop specific proposals to optimize processes, minimize risks, and strengthen presence in global markets.

Specialization areas and services

Market research for importers and exporters

Provide key information about the behavior of the products in the most attractive international markets, facilitating strategic decision-making.

Comprehensive advice on export and import projects

Provide strategic advice on the planning and execution of foreign trade businesses, optimizing each stage of the process to ensure successful and sustainable operations in international markets.

Customs and Document Management

Ensure compliance with customs regulations and optimize operation to reduce customs clearance costs and times..

Export and Import Logistics

Optimize the international supply chain to reduce costs, improve delivery times, and ensure operational efficiency.

Development and Optimization of Business Logistics Areas

Design and implement efficient logistics structures within companies to improve foreign trade management

Value proposal

- ✓ Contact network and strategic alliances in international markets.
- ✓ More than 15 years of experience in managing foreign trade and logistics.
- ✓ Strategic and personalized approach for each company.
- ✓ Cost and time optimization at every stage of the process.
- ✓ Regulatory compliance and operational risk reduction.

Thank you for your time and attention !
