Success Stories

SUCCESS STORIES

Huckleberry

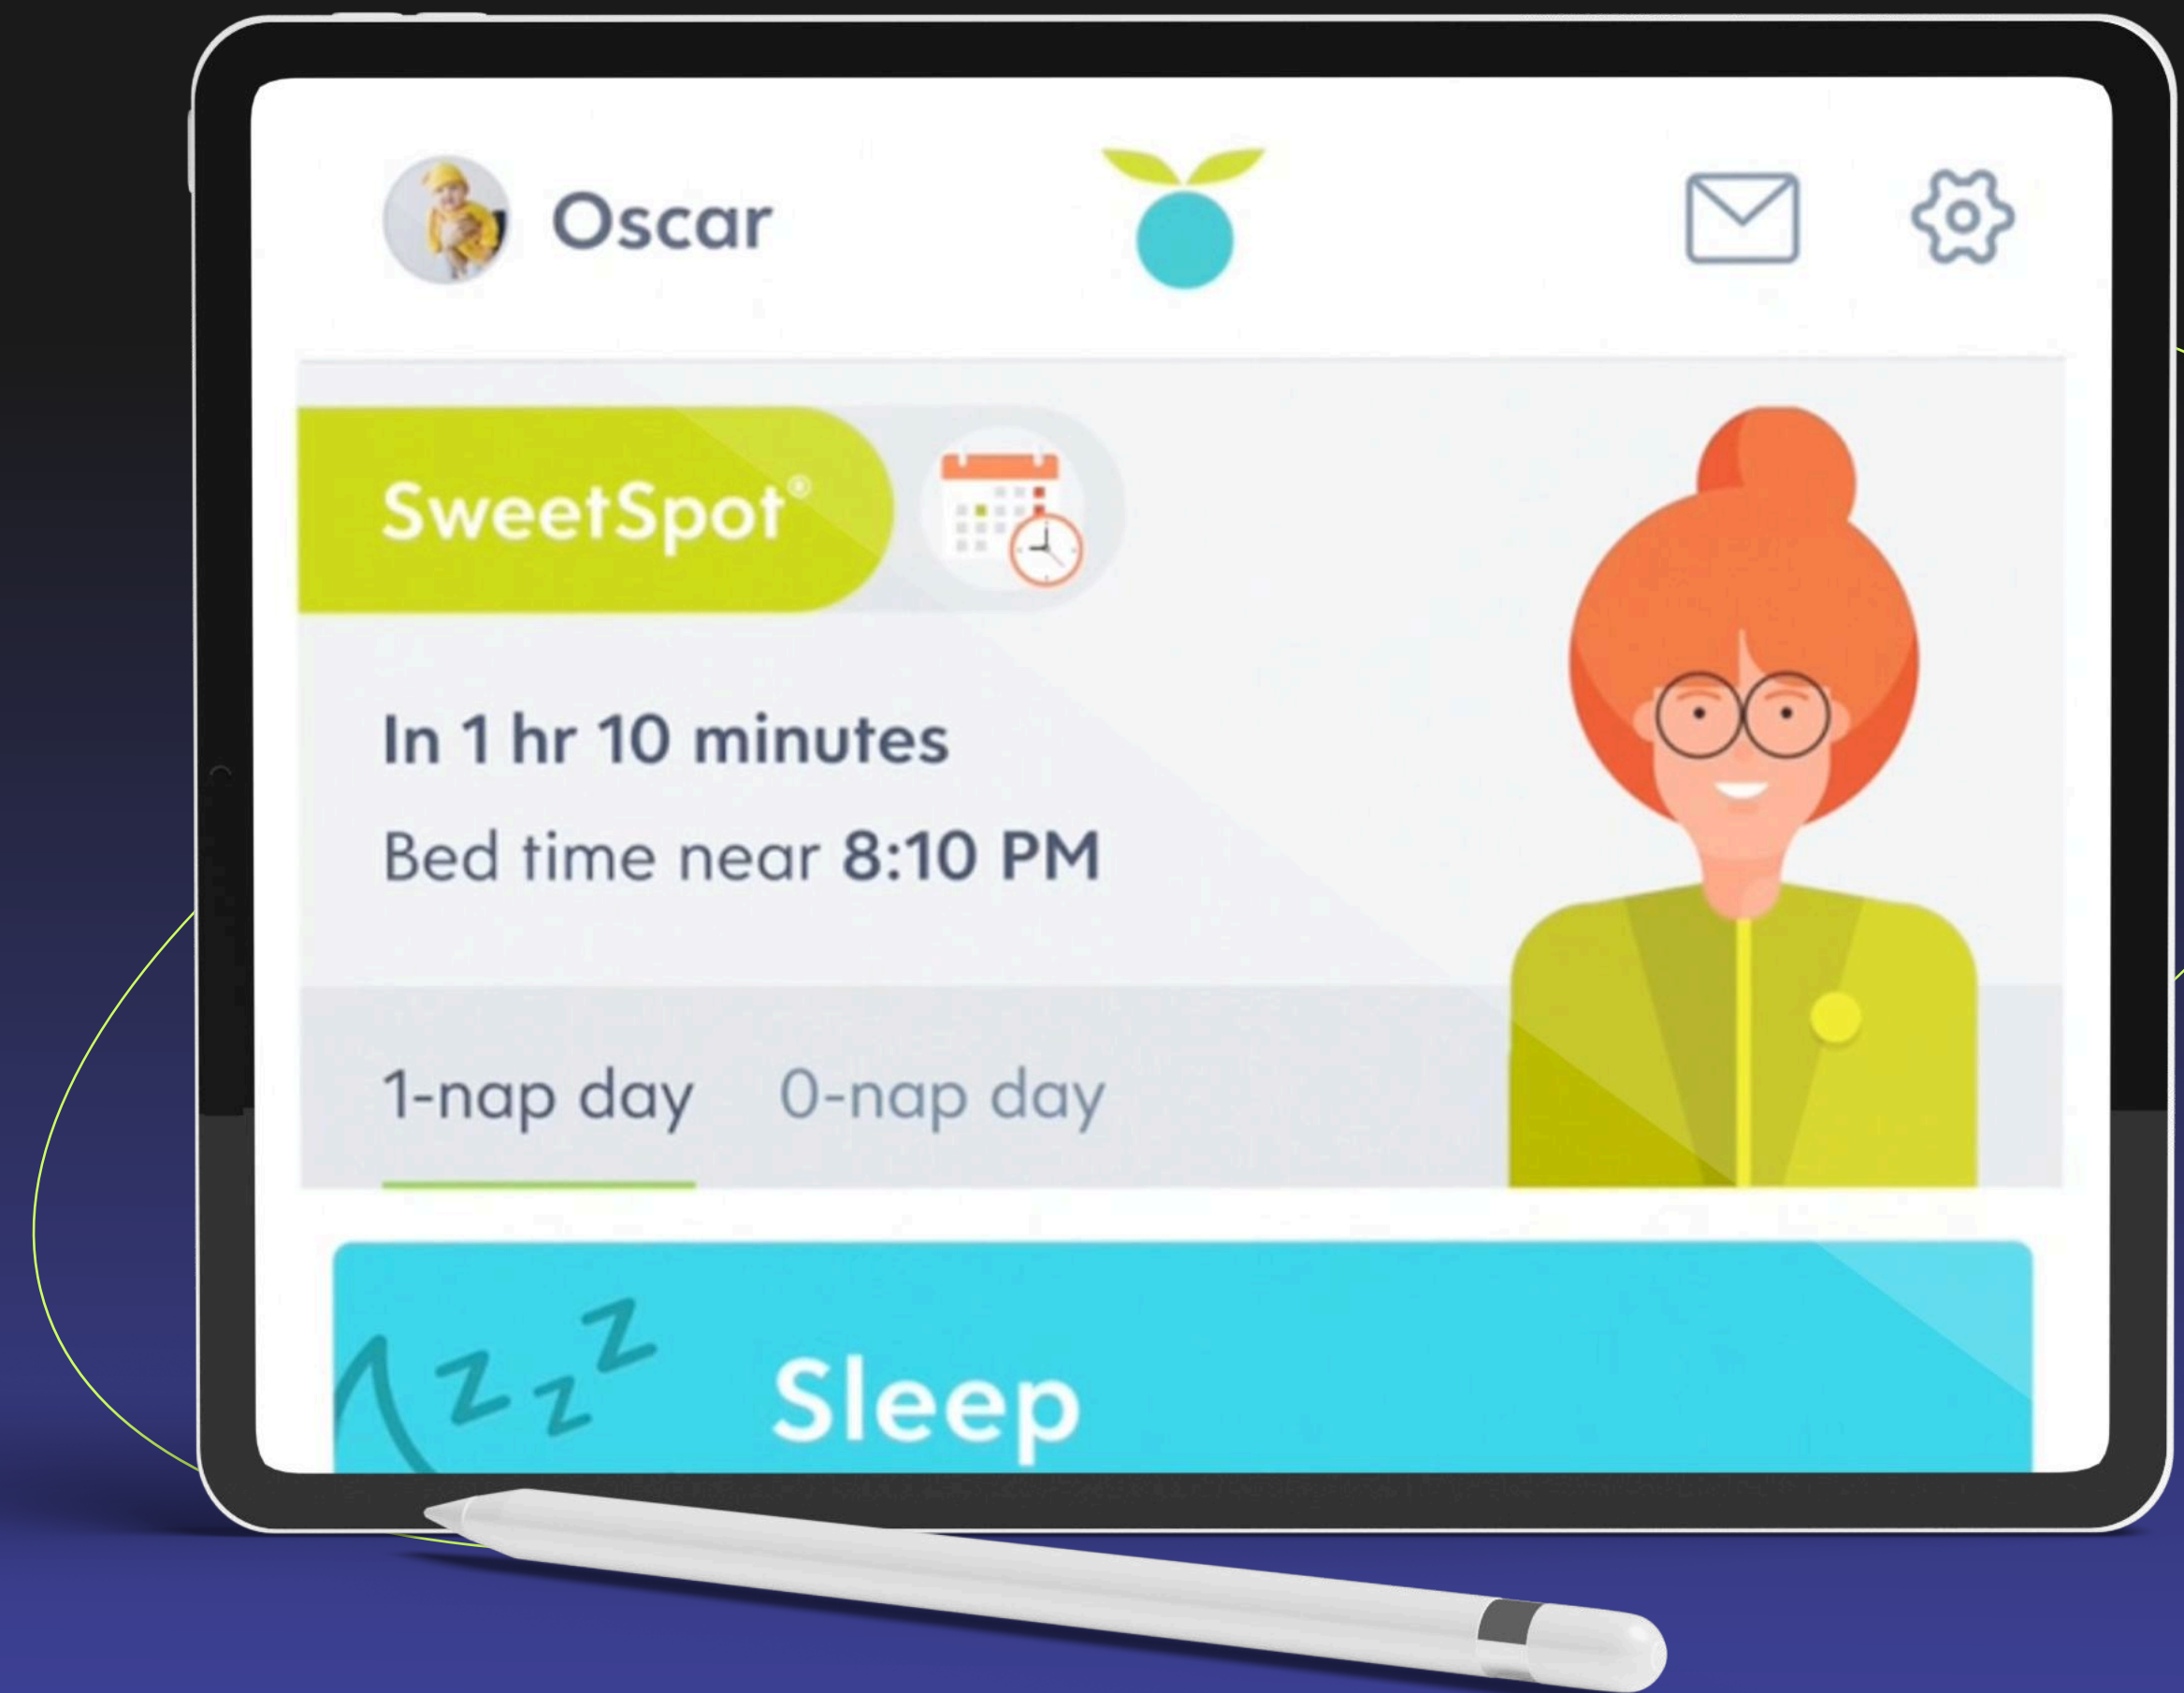

Healthcare

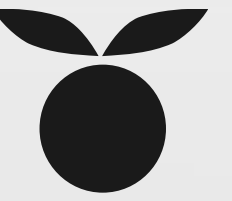

Los Angeles, CA.

About the Company

Huckleberry is a digital health company that helps parents improve their children's sleep and development through AI-powered personalization, data-driven insights, and evidence-based tools.

Tech Stack

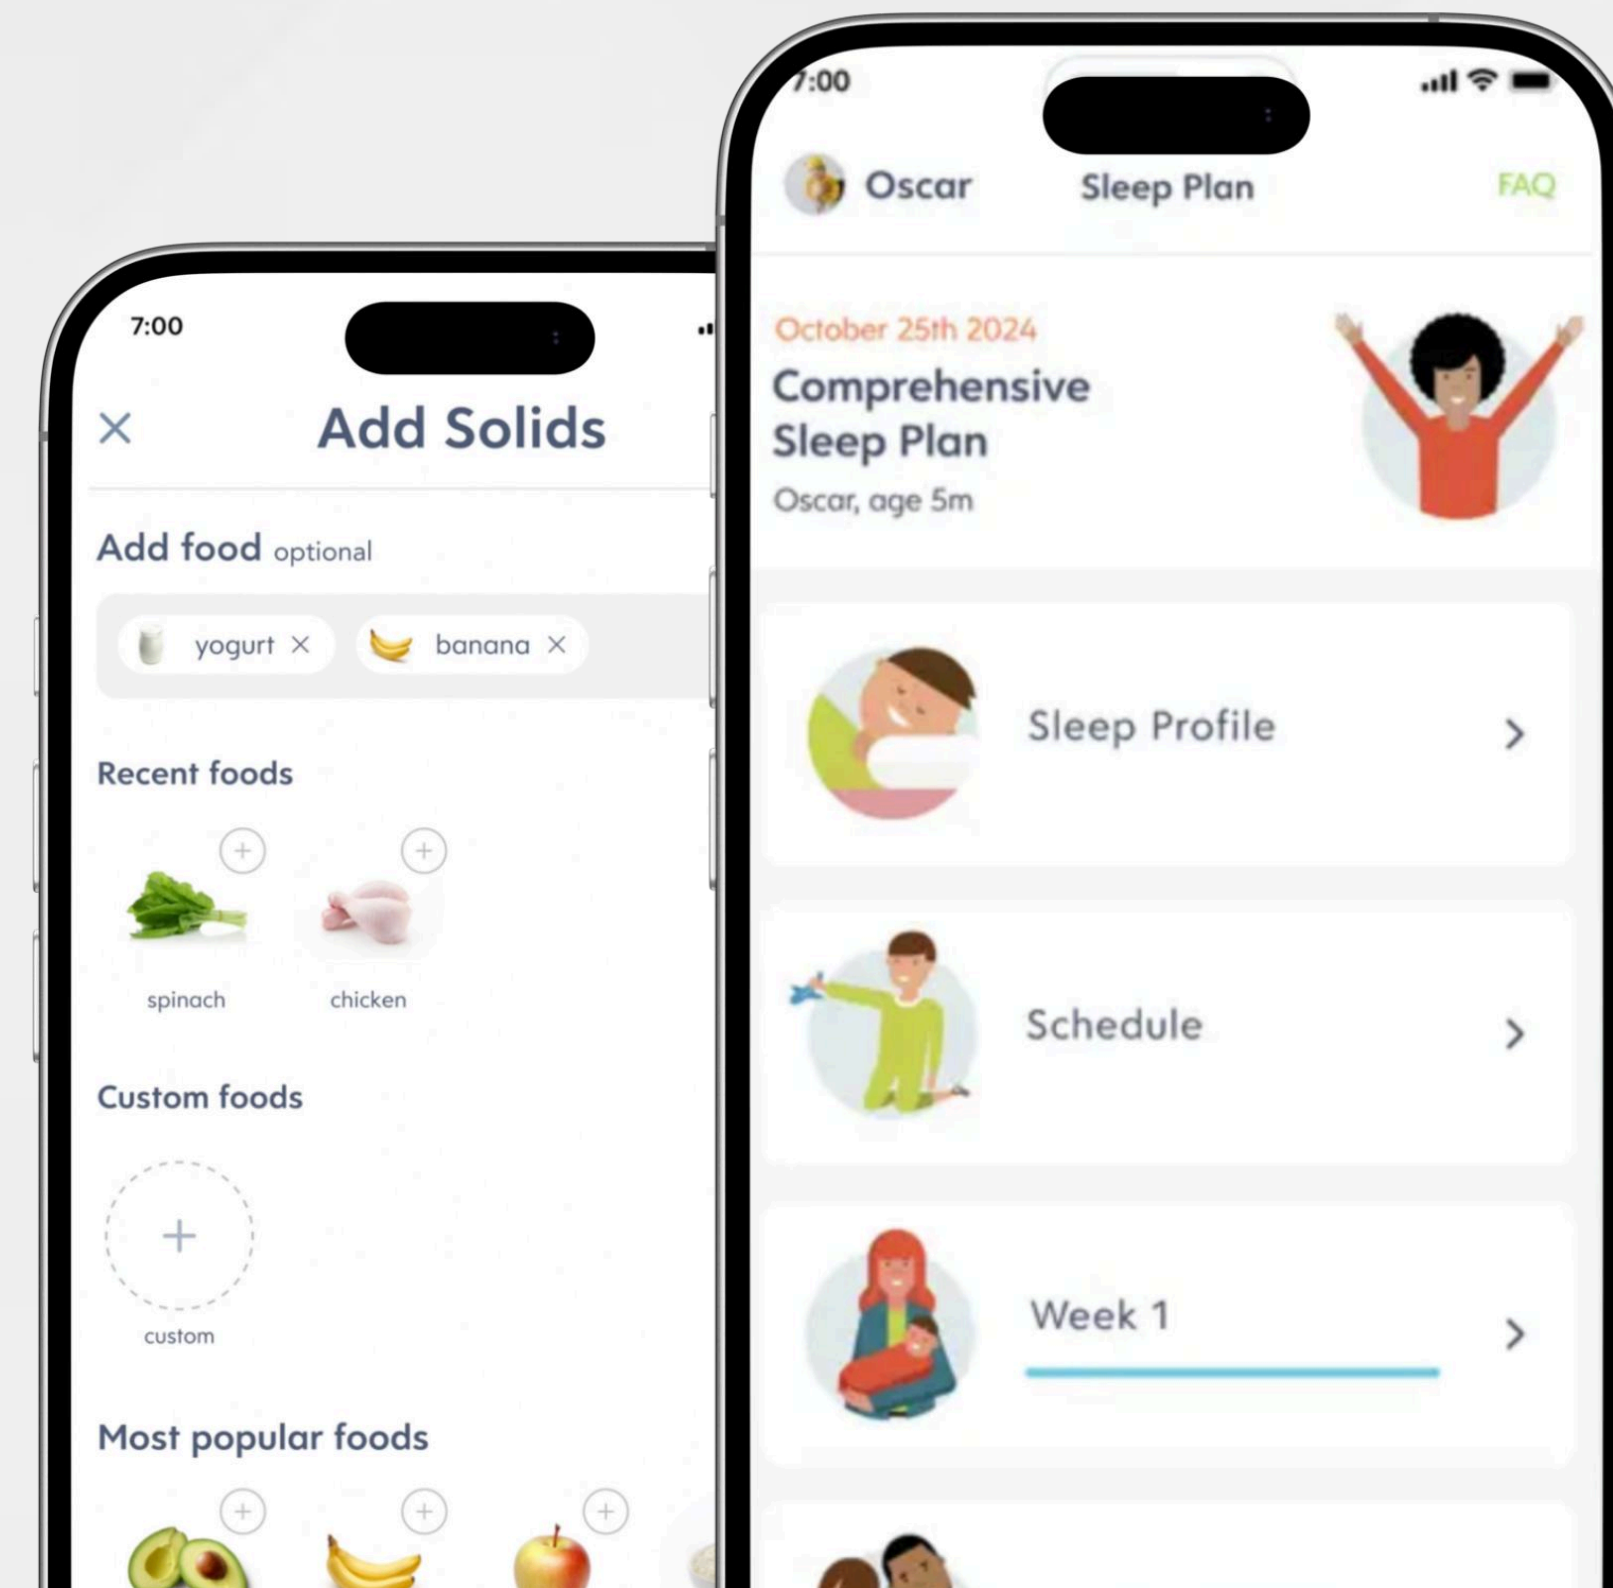

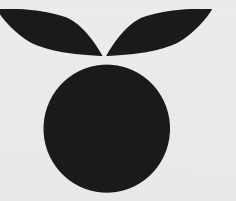

Challenges

- ✓ **Backend architecture unable to scale** with rapid user growth.
- ✓ **Outdated payment infrastructure** lacking modern integrations.
- ✓ Ambition to launch new, innovative products **without dedicated engineering support**.
- ✓ Scaling the **AI-driven personalization** engine to deliver real-time recommendations for millions of families.

Our Approach

- ✓ **Migrated legacy infrastructure** to Google Cloud Platform with Terraform, enabling scalable platform engineering practices.
- ✓ **Resolved critical data accuracy issues** impacting acquisition and decision-making.
- ✓ **Upgraded the monetization experience**, implementing a modern checkout and integrating growth and marketing tools.
- ✓ Built the **foundations** for new products, including content delivery, core UI components, and key user flows.

Impact

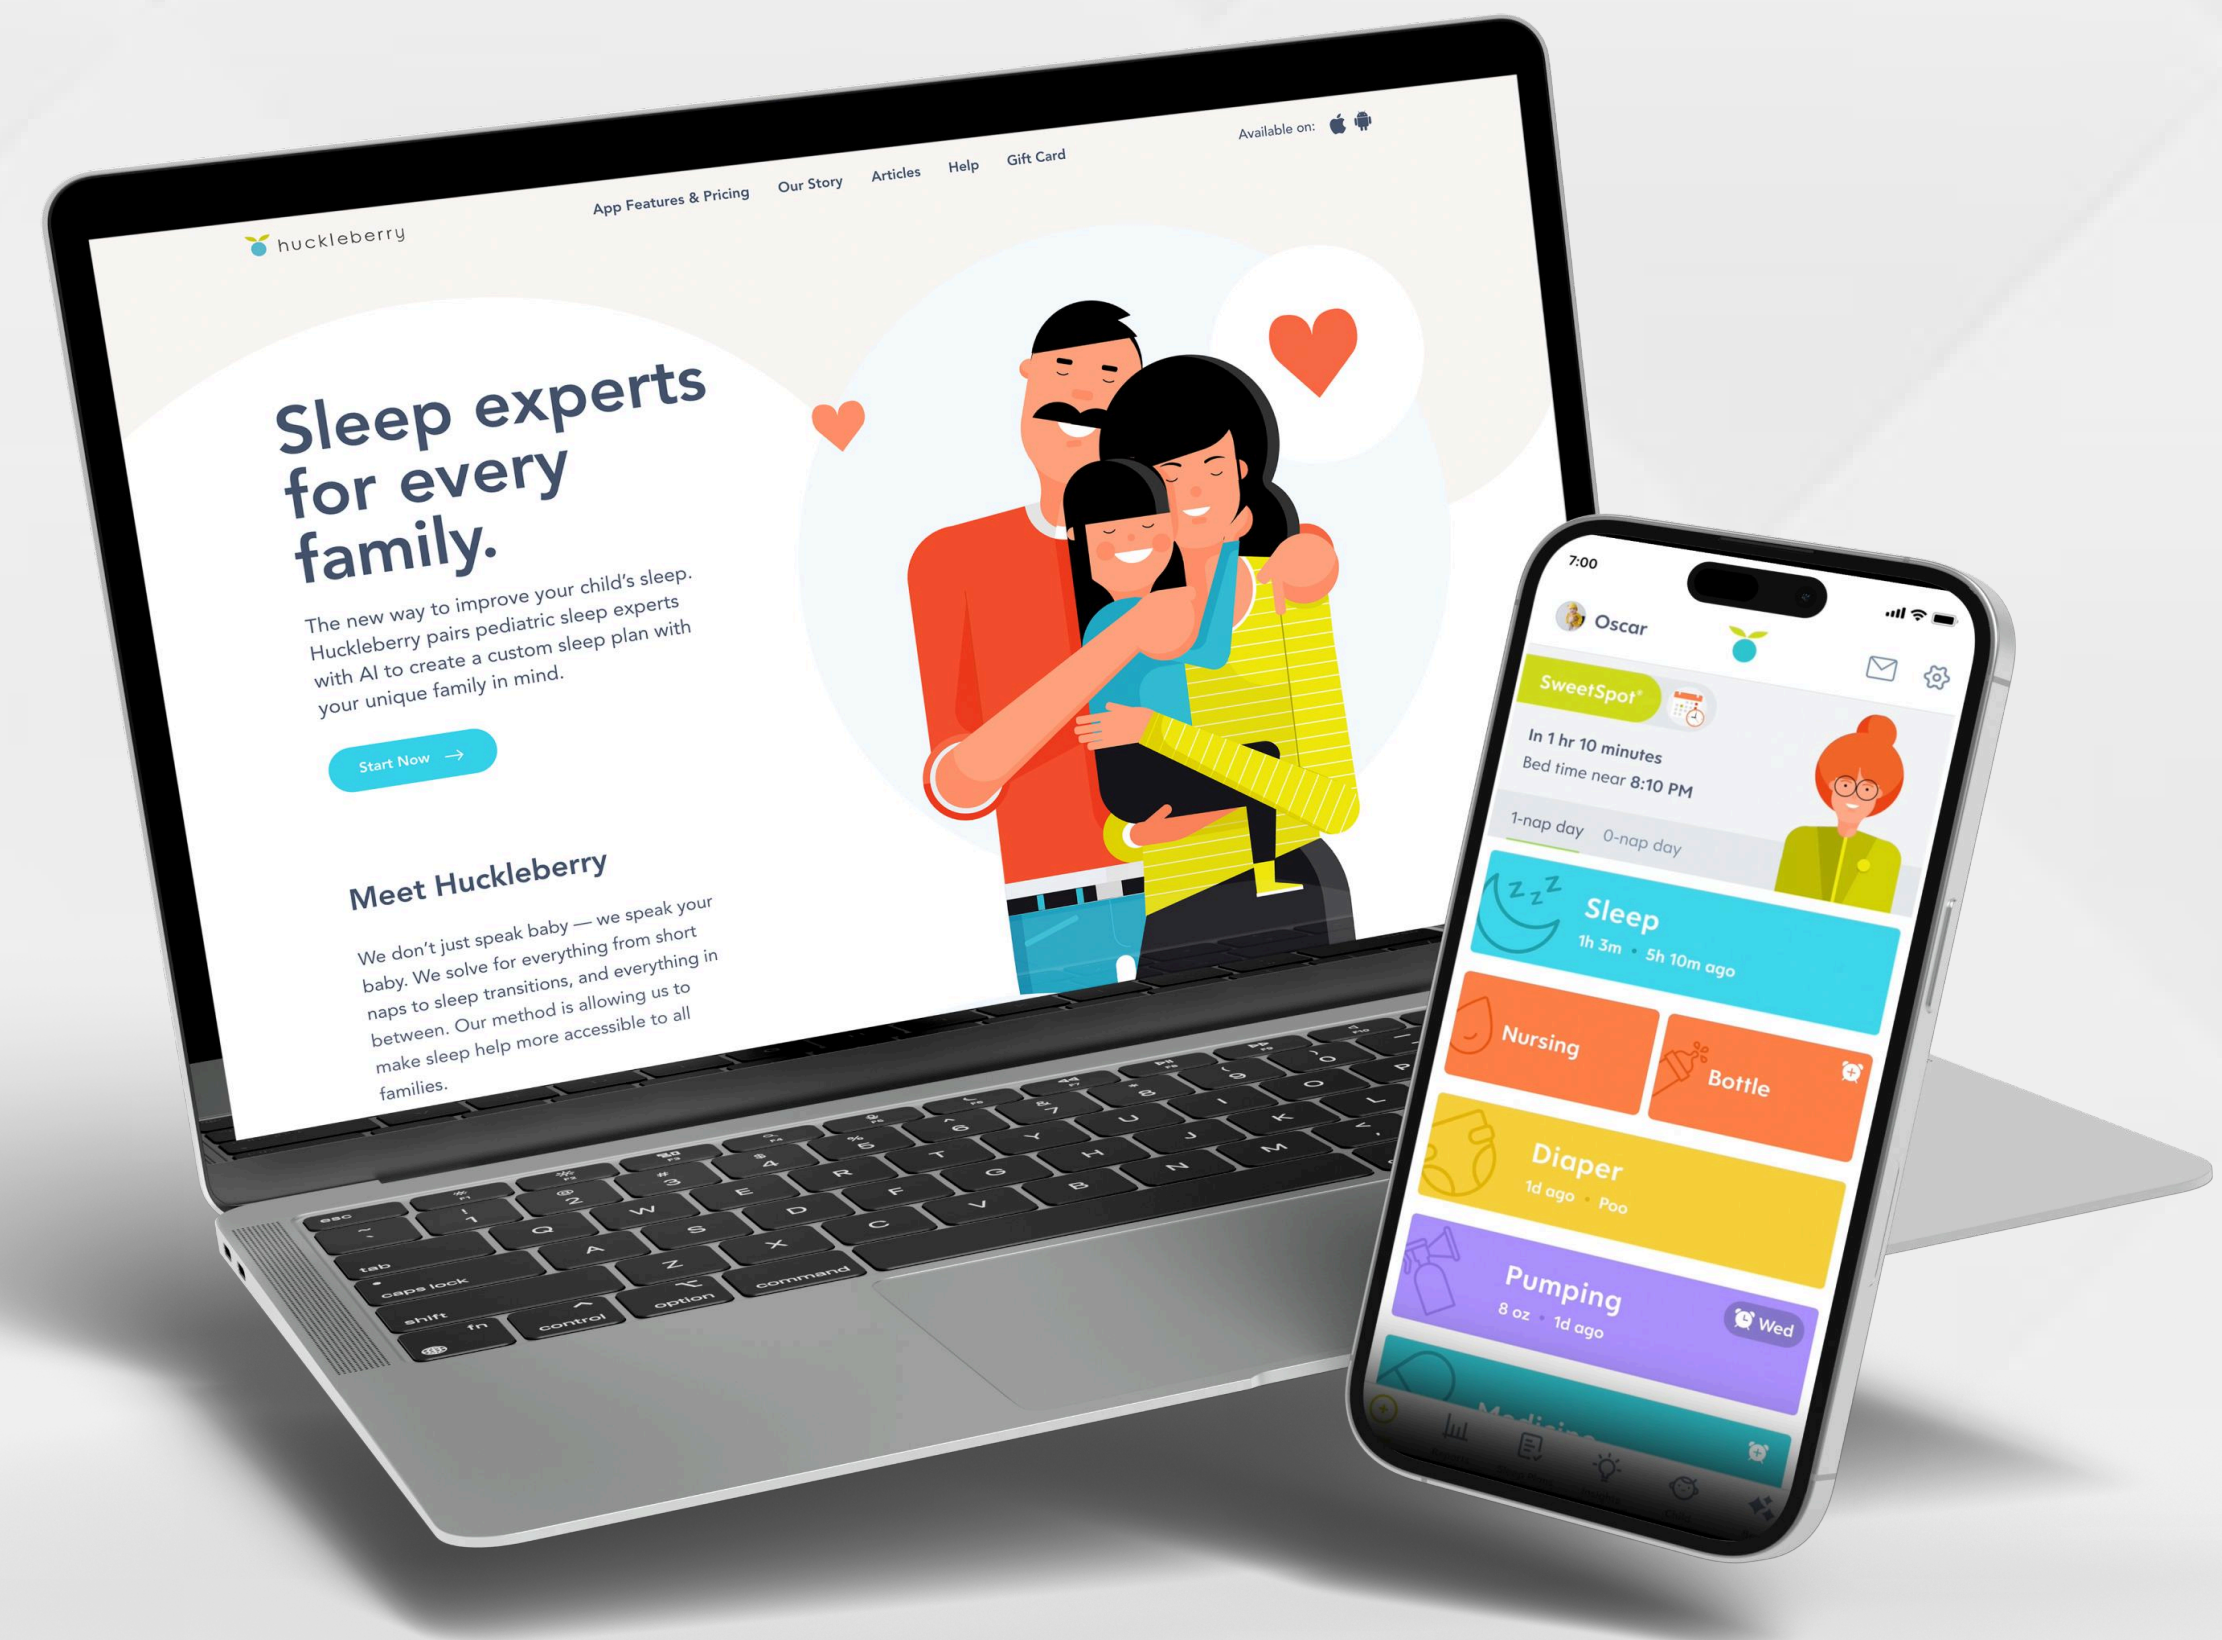

Trusted by 5.5M+ active users

Strengthened core infrastructure

4.9 stars on App Store and 4.8 on Play Store

Added +10 engineers to support full-stack development

Addressed critical issues, enabling more reliable growth and acquisition insights.

SUCCESS STORIES

SpotOn

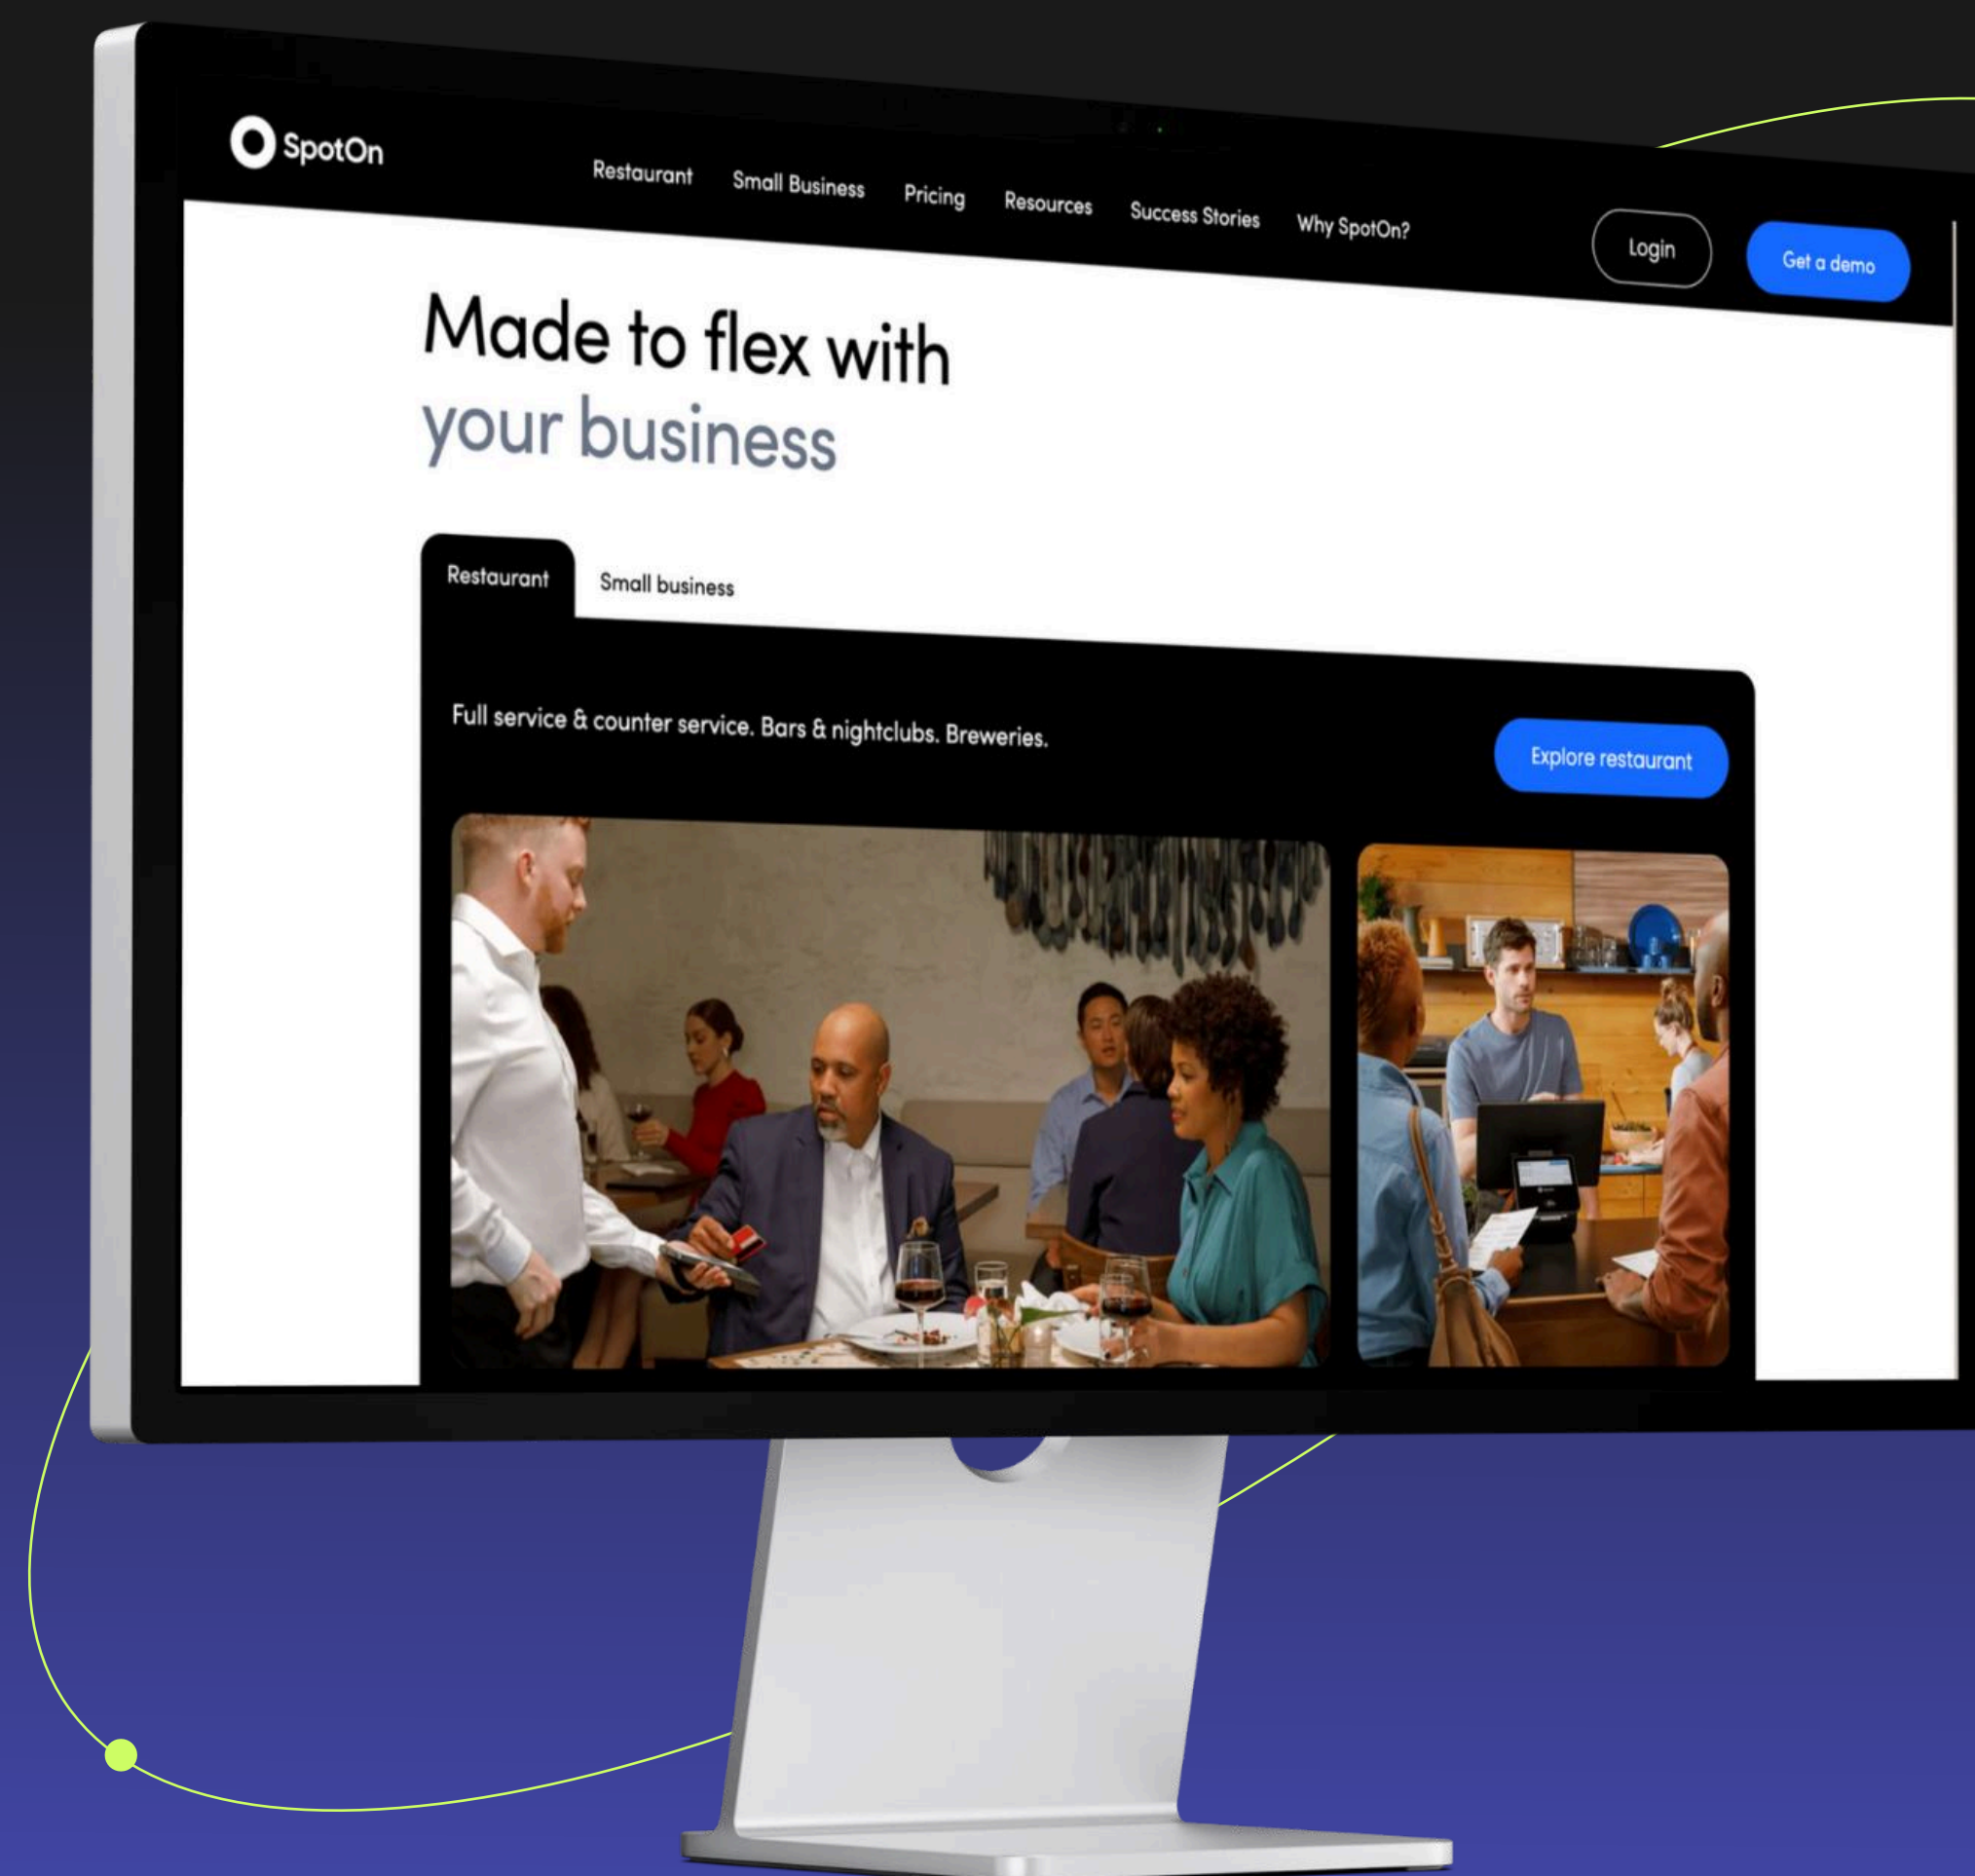

Fintech

San Francisco, CA.

About the Company

SpotOn is a cloud-based point-of-sale platform serving small and medium businesses in the hospitality industry. Their solutions streamline online payments, tableside ordering, fraud protection, and more.

Tech Stack

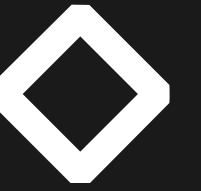

Challenges

- ✓ Needed **proactive engineers** capable of high-level architectural decision-making, not just task execution.
- ✓ Required **unified management across a fragmented stack** (Android, iOS, Web, Go, PHP, and PaaS).
- ✓ Delivering **mobile-first, contactless solutions** (tableside ordering/payments) without sacrificing speed or security.
- ✓ **Lack of automated, observable systems** to support thousands of concurrent SMB transactions.

Our Approach

- ✓ Deployed **20+ specialized engineers** into cross-functional squads, providing immediate expertise in Mobile, Web, and Backend systems tailored to SpotOn's unique product roadmap.
- ✓ Built a unified engineering platform with **automated CI/CD and observability, and deployed AI-powered tools** for real-time fraud detection and transaction monitoring.
- ✓ **Unified Engineering Platform:** Built a scalable foundation with automated CI/CD and observability, enabling the rapid deployment of AI-enhanced tools for fraud detection and real-time transaction monitoring.

SUCCESS STORIES

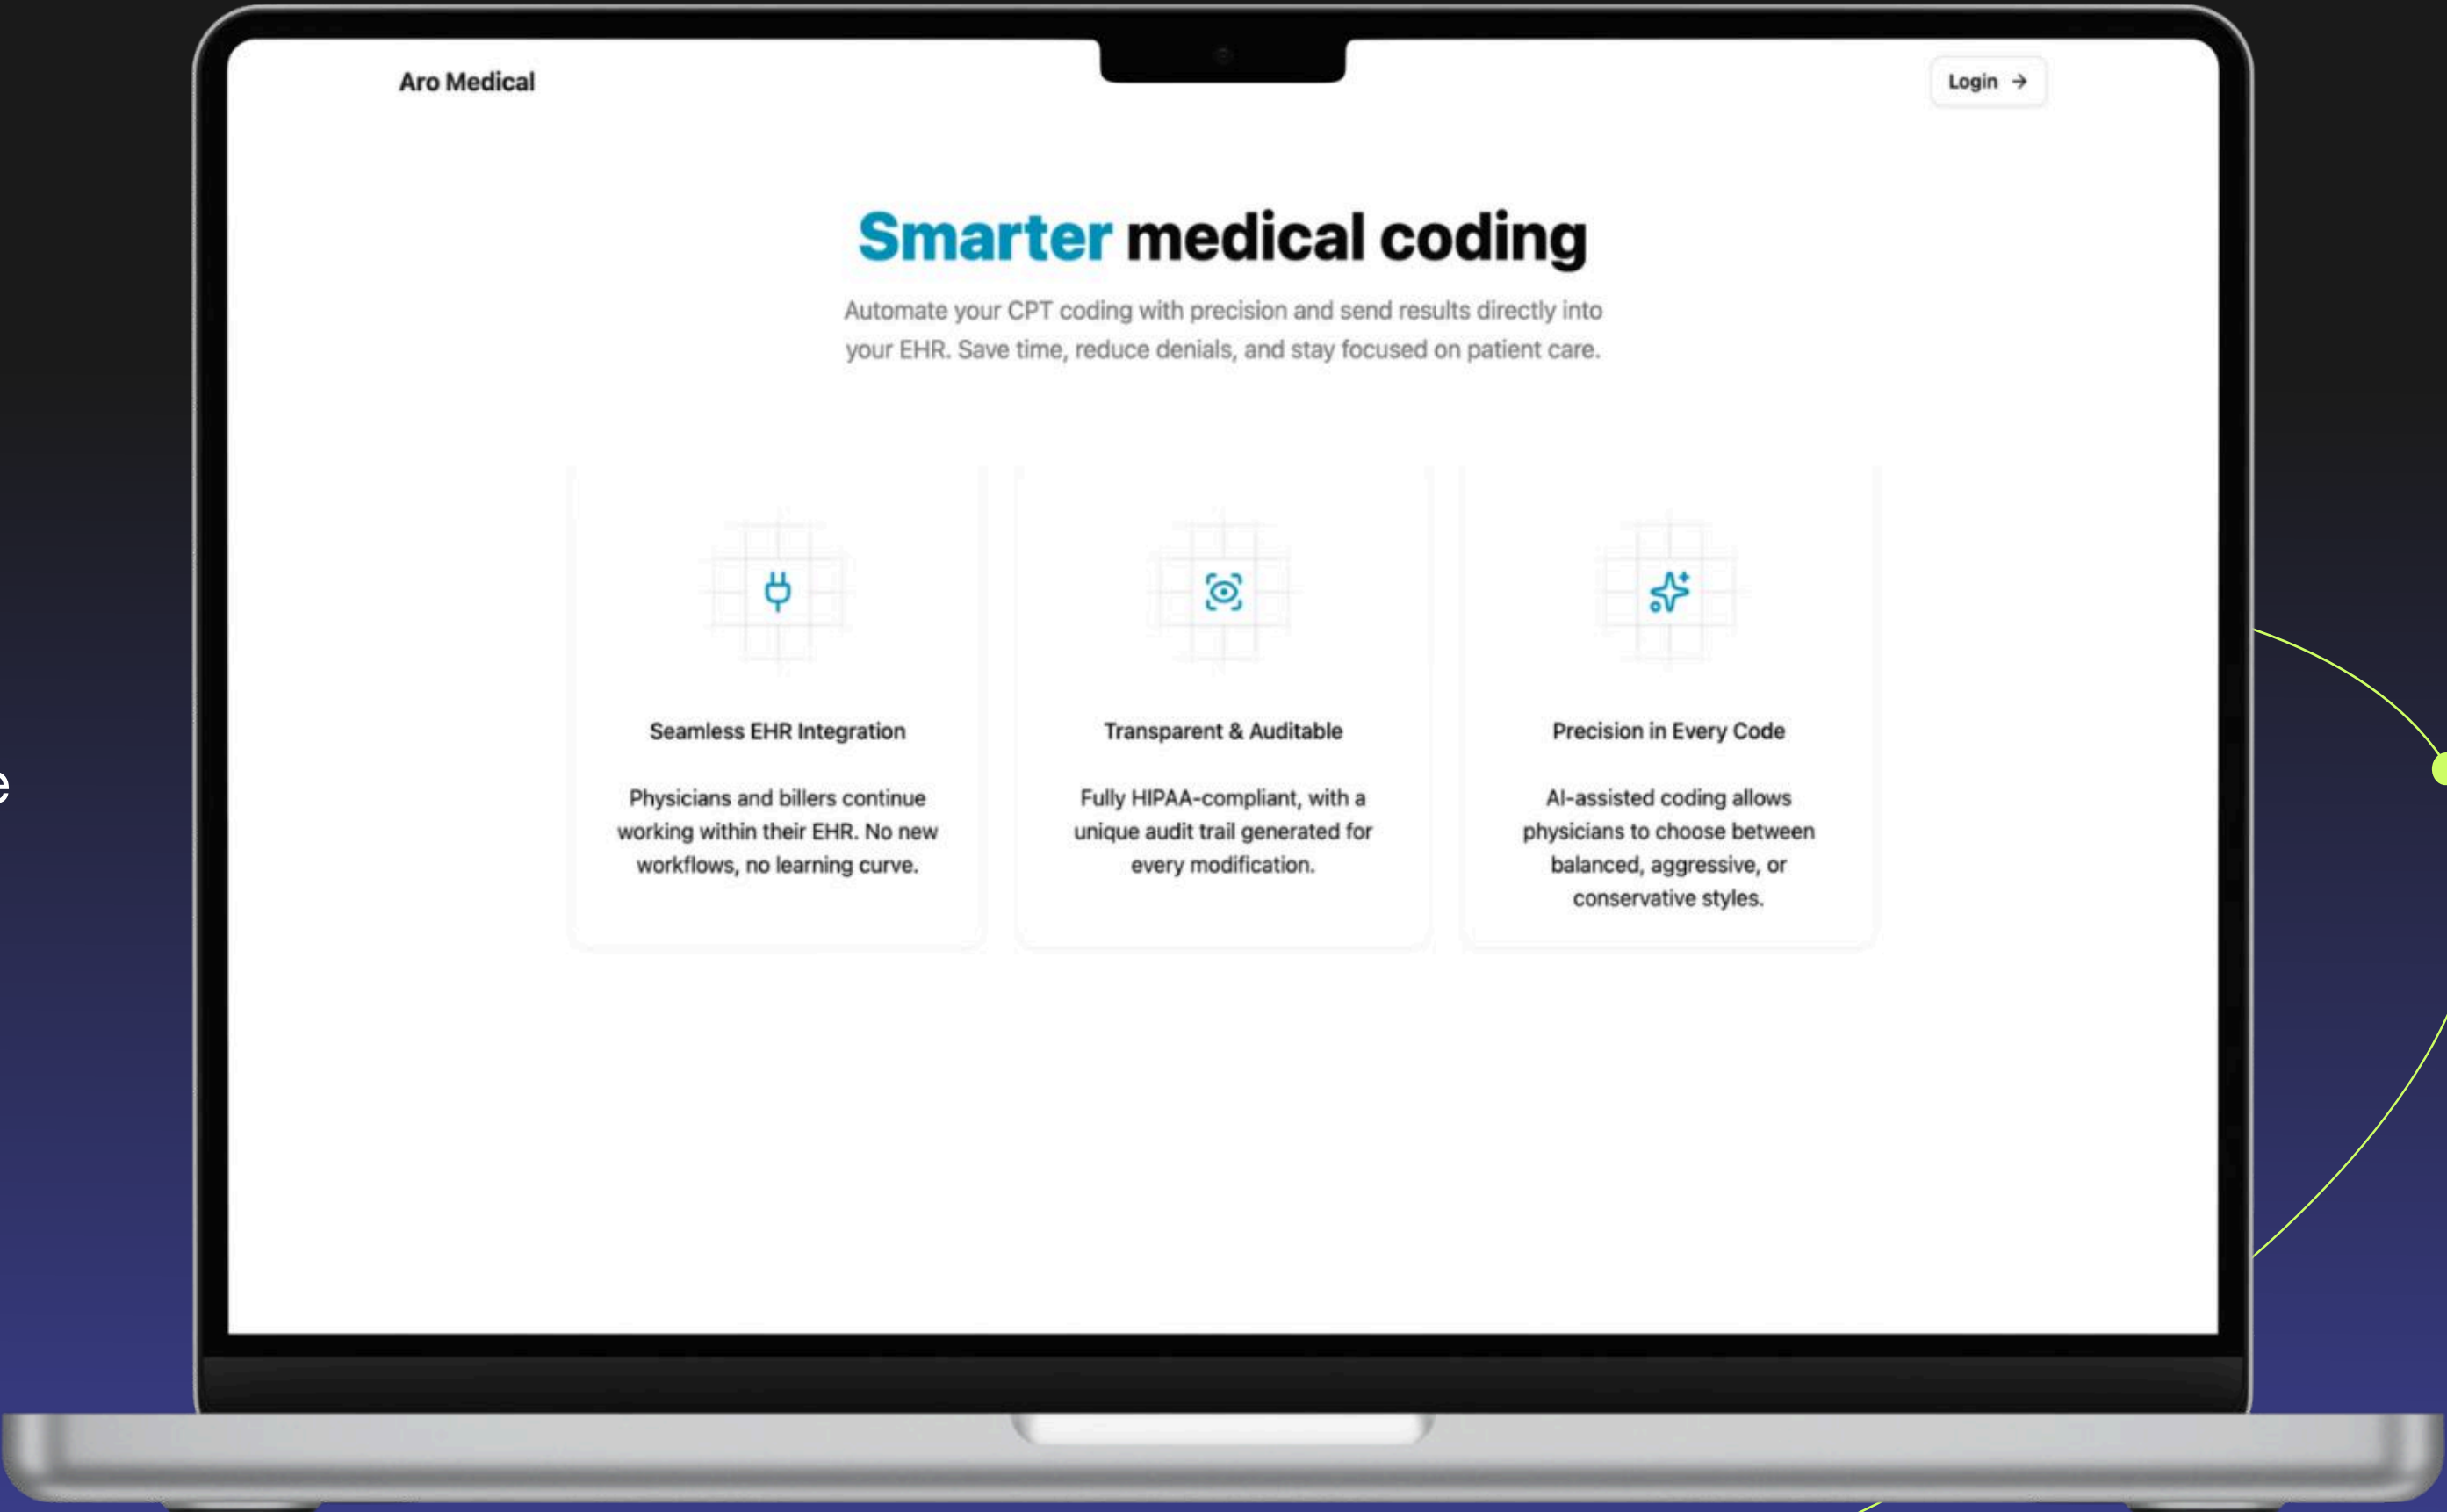

Aro Medical

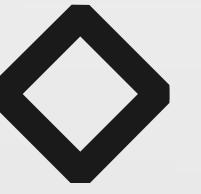

Healthcare Los Angeles, CA.

About the Company

Aro Medical is a healthcare company focused on providing innovative medical devices and technology solutions that support clinicians in delivering safer, more effective patient care.

Tech Stack

Challenges

- ✓ Integrating with multiple EHR systems with **different standards and implementations**.
- ✓ Structuring unorganized clinical notes **into accurate CPT codes**.
- ✓ Maintaining **quality standards** while accelerating product launches.
- ✓ Supporting **real-time clinical and billing workflows** with zero tolerance for errors.

Our Approach

- ✓ Became a **true extension of Aro Medical's team**, integrating seamlessly into their workflows.
- ✓ Built a **lean MVP** focused on speed, efficiency, and early validation.
- ✓ Integrated with existing EHR systems using standards-based **interoperability**.
- ✓ Improved **clinical coding** accuracy using AI-driven solutions.
- ✓ **Collaborated closely** with the founding team to iterate quickly.

Testimonials

DISCOVER WHAT OUR CLIENTS HAVE TO SAY ABOUT US

Joshua Rhoades

Sr. VP Of Technology,
SpotOn

We needed a partner who goes beyond just executing tasks, people who understand goals, and make recommendations. Devlane delivered, quickly staffing skilled teams that integrate with ours. Their integrity, expertise, and proactive approach make them more than a vendor, they're a true partner we can rely on.

Justin Ho

Sr. Offshore Program
Manager, Flipp

Our culture is what we call 'the three Hs': humble, hungry, and highly intelligent. Devlane's talent acquisition team is fully in line with us, making the hiring process seamless. They quickly find top-tier candidates who integrate smoothly, hit the ground running, and align perfectly with our culture, truly setting them apart from other vendors.

Dave King

Former CTO, Everlane

Devlane has helped us scale our engineering team quickly. They've found highly skilled software and data engineers who integrate with our team and contribute to projects from day one. The speed and quality of their hiring process, along with the way their resources come up to speed, make them a reliable extension of our team.
