

Introduction

- Tiller Team Kft is a family owned small enterprise situated in Veresegyház, near Budapest
- We produce injection moulded plastic products on demand
- We make an offer based on a sample or technical drawing. Although we don't have a development department, we are in contact with various engineering offices throughout Europe
- We offer the mould making, production, - if necessary - montage, packaging and delivery of the plastic items

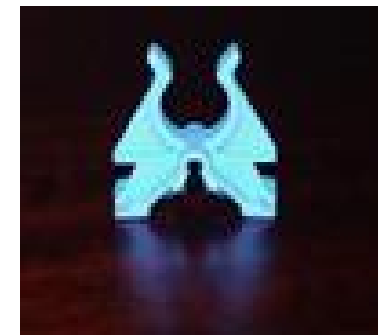

Production

- On machines made in Germany (Krauss Maffei, Demag)
- Clamping force between 35 to 150 tons, max. shot weight ca. 300 g
- Auxillary equipment on site (dryers, material forwarder, mould temperature regulators,...)
- Experience in processing the majority of engineering plastics, except PVC
- 90 % of our production will be exported to Germany, Austria, Swiss, Italy or Bohemia

Products and QS

- Our products are so far components for mechanical engineering, switches and covers, houses and flanges for filtering, fixture for building and construction, accessories for packaging in small (5.000 pcs) as well as big (million pcs) series according to the needs of our customers.
- To prove and secure the continual good quality of our products we have introduced and maintain a QS system, currently the ISO 9001:2008
- We frequently participate and visit fairs, professional trainings and business to fair events
