

# Coro Cloud App Security

Enterprise-Grade Cybersecurity for Organizations of Any Size.

## CLOUD ENVIRONMENTS ARE RIDDLED WITH SECURITY GAPS

The widespread adoption of cloud applications and storage exposes security vulnerabilities. Popular apps like Google Workspace, Microsoft 365, Salesforce, Dropbox, Box, and Slack often lack sufficient protection, leading to undetected security gaps. The search for comprehensive cloud security can strain IT teams with expenses and tool overload, risking burnout.

### THE ULTIMATE CLOUD APP SECURITY SOLUTION

Coro Cloud App Security is a robust solution that detects, alerts, and remediates security gaps in your cloud environments.

This includes: Microsoft 365 Google Workspace Salesforce Dropbox Box Slack

Coro Cloud App Security automates remediation for 95% of all tickets, and offers clear, actionable remediation guidance for the remaining 5% of security alerts requiring manual intervention.

### CORO CLOUD APP SECURITY

Monitors user activity, protecting user accounts and cloud drives.

Does not interfere with app performance.

Supports an unlimited number of users for growing businesses.

### THE TECHNOLOGY BEHIND CORO

Coro provides advanced protection and regulatory compliance support with:

Zero impact on technical functionality and performance.

Zero disturbance to end users' productivity.

### KEY FEATURES OF CORO

#### BUILT FOR LEAN IT TEAMS

Designed to be easy to install and manage. Requires no hardware.

#### MODULAR SECURITY

The unique modular architecture allows all modules to share one endpoint agent, one dashboard, and one data engine. Modules inform each other, eliminating blind spots, resulting in significantly improved security posture.

#### ADHERENCE TO PRIVACY REGULATIONS

Helps your organization align with applicable laws of data privacy, security, and compliance, including HIPAA, CJIS, and more.

#### SMART AUTOMATIONS

Utilizes advanced AI to automatically detect, flag, prioritize and remediate the full range of security vulnerabilities.

#### PLUG & PLAY SETUP

Easy to set up and configure without adding workloads to overextended IT teams or requiring extended configuration knowledge.

#### CORO PROFESSIONAL SUPPORT FOR ADDED PROTECTION

Helps IT teams tackle and swiftly remediate the 5% of malware and phishing alerts which cannot be automatically handled and require manual intervention.

## ABOUT CORO

Coro's Modular Cybersecurity platform brings enterprise grade protection to companies of any size. All current and future modules share one endpoint agent, one dashboard, and one data engine, dramatically reducing implementation, configuration and operation workload.
