## About Us

In times of change in the Bolivian market, the demand as never before, requires excellence in service, experience, professionalism and specialized know-how.

V8 Corporate Development Solutions offers all this under a scheme of "Dedicated and Personalized Service", aimed at customers who require an excellent service.

This business unit's mission is to provide technological solutions at the highest level, by providing its customers cutting-edge technology and specialized software development for each need.

Our services are focused on businesses, industries and individuals of the most important companies and institutions whose risks are specialized and classified not only by the volume of assets that they contain, but also by the concentration of risks and procedures involved in their operation or specialty.

We offer you our professional staff with over 10 years in the business developing impact technological solutions for leading companies and institutions in Bolivia.

## Our job is just fascinating.

For over 7 years, we have been focusing all our effort on time and energy to develop creative and specialized software, analyzing procedures and turning them into controlled-systems, creating specific solutions for a variety of current problems our clients go through.

Every day, new and more exciting challenges arise to face and surpass, this is why we feel so fascinated for all we do. No doubt, this feeling has turned us into real leaders of:

1. - Capable of Analysis and Systematization of Data
2. - Logical Reasoning and deployment
3. - Web Applications development
4. - Web Presence 2.0

All these accomplishments motivate us to constantly reinvent ourselves without losing sight of our own fundamental values.

Our efforts have been reflected in a solid, adaptable organization that evolves every day, thanks to our fast and efficient response to any customers' requests. Efficiency, which is a fundamental policy in our organization, and combined with the constant optimization of our processes across all segments, it allow us to exchange experiences and develop joint solutions more quickly and effectively.

The fascination, in which we are involved, motivates us to venture beyond the specific market sectors to search exceptional solutions to unconventional problems. Working by market segments is another example of the V8 's audacity to diverge from established standards. This way, our customers receive the maximum reward specially when we provide Custom software development solutions, and of course without omitting solutions based on products.

Will there be anything more fascinating?

Welcome to V8 SRL!

Best regards,

Henry Pereyra  
General Manager

## We are different.

When the target is to work on specialized software development, V8 Srl. is now a valuable partner. Why? Well, because we became the best provider of innovative system-solutions with comprehensive thinking, a committed partner. We anticipate the facts in a different approach from the rest and what is more important, one of the best producers of systematized products technically speaking. Our professionalism is unique in the market as well as the experience we achieved with over 10 years of passionate work.

## Our experience is our best guarantee.

Experience is not easy to achieve: First off, you have to gain it in a day by day hard work, learn from others and set it up constantly, this is why it is so valuable. Using it, you can develop bright ideas and innovative visions to show new guidelines. Anyone, who makes this his top priority, just like us, will value even more the importance of experience for a company. Therefore, we strive to broaden our experience and share it with our customers, as a result, we all benefit from it.

## We love challenges. And we go for them.

We invest a lot of time in the research of development technologies which makes us different from others. Constantly innovating and fulfilling the most demanding requests. Effective problem solving is our business. Our goal is to generate only top-quality systems, and we have the expertise to do it by monitoring markets and needs from which we get the right solution for critical requirements that our clients are looking for their products or processes. Thus, when a company or client contacts us we already have the solution.

## We are audacious.

In order to respond to the greatest challenges that customers demand, we are audacious, and at V8 is our priority to exceed your expectations. We strongly trust in our own ideas, continuously searching for new ways to develop products currently not available on the market. We provide specialized and systematized solutions to problems for today and tomorrow. As our track record prove it. We seek success and definitely we go for it!

## We are versatile.

We are open to the changes of paradigms; we have the skill to adapt and to ensure all these changes become a benefit. Our experience has taught us, that the solution developed for a particular sector may also be the solution for other sectors. This means, for example, what we develop for a Telecommunications company, can also be useful for a Broker. The logical consequence is that we do not structure our offer by sectors, but by application type.

## We provide personalized attention.

It is difficult to build long-term relationships, in which a client and the company feel comfortable and understand both sides of each other's needs. We are specialists in ensuring that the personalized attention we provide becomes long-term commercial relationships, based on mutual trust and linked to the efficiency of our services.

Come and meet us, we are ready to offer you real solutions!
