- Products Made: **Plywood – Beams & Posts Laminated S4S– Lumber S4S**
- Square Footage of Building: **50.000 m2**
- # of Employees: **500 Employees**
- Annual Sales (USD): **40 millions per year**
- Monthly Capacity (in pieces) Total Factory: **20.000 m3 per month**
- Year Opened or Expanded: **28 Years of Experience in the lumber market**

Current Customers and Exports

- Domestic: 80%
- Exports: 20%

**Capacity:
200 containers per
Month**

Main Customers

Chile – Perú – Colombia –
Mexico:

USA:

Product Quality Summary

Product Quality Summary

Forestal Leon's exceptional quality, superior appearance, flatness, durability and dimensional stability are ensured through rigorous standards of sustainable forest management, log selection, and process control. panels are made from pruned, plantation-grown Radiata pine logs for fewer knots and clean, uniform, light-colored faces that finish beautifully and consistently. For flatness and stability, panels are laid up on composed cores using exterior phenolic (PF) resin.

Our Plywood is 100% wood which provides your projects a decorative finish with wood's natural look. our product is Radiata Pine plywood manufactured with phenolic resin in accordance with international product standards. It's ideal for interior and exterior applications such as furniture, decorative paneling, industrial projects and construction.

Product Proposal

Plywood T1-11 & Treated

Description:

- Pressure treated for long lasting and better performance
- Durable and easy to work with for exterior applications
- Perfect lumber for barns and sheds
- Thickness: 9mm – 12mm – 14,3mm

Product Proposal

Product Proposal

Model Beams & Posts Laminated

- Beams is an interior use beam suitable for garage door headers or interior support beams.
- Industrial Grade can have imperfections such as visible edge knots, slight wane, surface checking and glue squeeze-out
- High strength allows for wider spans between support posts or columns
- All our products are Radiata Pine
