- Quality inspection of incoming products

Vexpro follows up the hired personnel performance and provides frequent training in order to achieve your goals and guarantee a high quality service.

Consulting and Audit Services

Vexpro helps you improve your processes and avoid possible violations of mandatory sanitary legislation

Auditing is an important tool to initially diagnose your processes and provide oversight on the performance over time; it also allow creating effective action plans keeping business competitiveness with products in compliance with legal regulations such as Good Manufacturing Practices (GMP), Good Distribution Practices (GDP), Good Storage Practices (GSP), Good Laboratory Practices (GLP) among others.

Do Not Worry!

Vexpro supports you assessing and choosing those suppliers that best fit your needs, without affecting your product quality. We also help you with due diligence processes to assess other companies you are willing to acquire.

We assess quality management system of companies being considered as potential product or service providers impacting your products and processes quality.

We also manage and execute your supplier/providers evaluation program in order to be aligned with your quality system.

We perform due diligence on quality assurance and regulatory affairs, as part of the preliminary assessments prior to any acquisitions.

Your Company needs competitive products, processes and services. Vexpro works with you to implement a quality management system that best suits your needs.

Currently, to be competitive your Company needs to keep a high quality standard such as: ISO 9001 Certification of Quality Management Systems, ISO 17025 General requirements for the competence of testing and calibration laboratories, ISO 13485 Certification of quality management systems of medical device manufacturer or ISO 22000 Certification of management systems throughout the food chain.

Training Services

Well trained personnel is an asset

Vexpro provides training to your personnel as part of the implementation process no matter the standard required.

We provide training to your personnel as part of the implementation process of a given standard.

Our service portfolio includes management of continuous training program your company has established for all your personnel, and provide the pre-specified training based on the established schedule.

We prepare lectures and training sessions as per your requirements based on your time availability and depth on the topic to be trained.
