

SKILLING THE WORLD FOR AI

wawiwa

WANTED NOW: JOB-READY AI AND TECH PROFESSIONALS

The growing skills gap is widening: people don't have the AI and technology skills that employers are seeking.

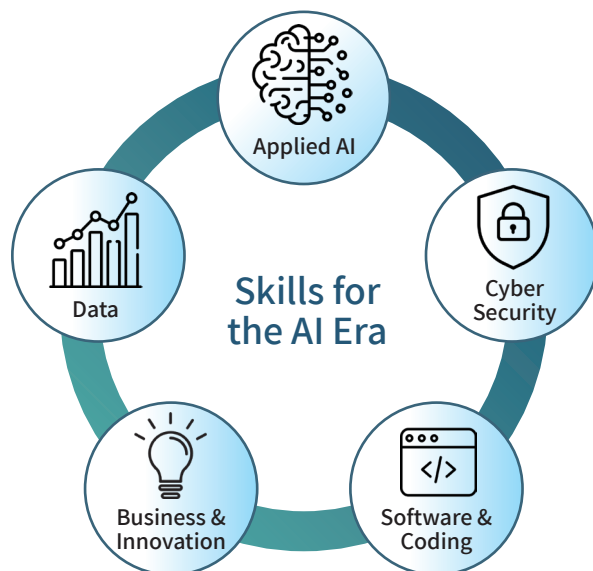

WAWIWA PARTNERS LOCALLY TO BRIDGE THE GLOBAL SKILLS GAP

Wawiwa develops AI programs and courses that lead to employability. We help colleges around the world to offer career-oriented training programs that help graduates land tech jobs and succeed in evolving workplace roles.

All programs and courses are customized to meet local needs and can be delivered face-to-face, online, or hybrid, in traditional formats or in accelerated bootcamp modalities. Programs emphasize hands-on assignments and practical projects to build students' skills while creating a portfolio to showcase to potential employers.

Our advanced **AI and tech skilling courses** for working professionals add AI and tech capabilities to employees' professional toolkits. We offer a wide variety of courses for learners of all levels, from introductory to advanced.

Our **professional development programs** help students with no prior experience gain the necessary knowledge, tools, and skills that align with AI and tech jobs that are in high demand. Programs consist of 50 to 450 clock hours, take 2 to 12 months to complete, and are easily converted to credit hour courses.

AI Full-Stack Developer

Enterprise AI
Implementation Specialist

Cybersecurity Specialist

AI Digital Graphic Designer

* Additional programs are available to meet specific local market needs.

JET DESIGN™ METHODOLOGY

Wawiwa's programs utilize our proprietary Job-Effective Training methodology, JET Design™. Our methodology is aimed at developing programs that meet the industry needs for job-ready AI and tech professionals. Over 50,000 learners have been reskilled through programs built using JET Design™, validating the methodology in over 20 countries and across cultures.

EMPLOYABILITY-FOCUSED TRAINING: BENEFITS FOR COLLEGES

Wawiwa places the utmost importance on job readiness and employability when developing curricula and programs and courses. By partnering with Wawiwa, our college partners find it easy to offer career-oriented AI and tech educational pathways.

Courseware

We provide ready-to-teach curricula and courseware that includes lesson plans, presentations, exercises, solutions, and student materials. Train-the-Trainer sessions ensure quality and consistent delivery. This enables colleges to launch job-ready AI and tech programs quickly and confidently, without developing content.

Market Adaptive

All Wawiwa programs and courses are modular, stackable, and customizable to fit the local workforce needs, from structure and duration to academic hours and expertise level. Colleges can align each program and course with local industry demand, ensuring graduates gain the exact skills that employers need.
