

Technology that moves your business forward.

Strategy • Governance • Execution

10 YEARS OF BUILDING TECHNOLOGY FOR REAL OPERATIONS.

Founded in 2015, Code Castle works with organisations that need technology to solve operational problems, improve existing systems or build new digital products.

10+ Years

Technology experience

200+ Clients

Across multiple industries

450+ Projects

Delivered

6 Countries / Markets

Americas + Europe

Founded in El Salvador.

10+ years building technology solutions.

TECHNOLOGY SERVICES BUILT AROUND BUSINESS NEEDS.

We help organizations solve the operational and technology challenges that slow growth, visibility and execution.

Improve operations

Digitise processes, reduce manual work and improve visibility across the business.

Build software

Web, mobile and business applications designed around specific operational needs.

Connect systems

Integrate platforms, APIs, legacy systems and third-party services.

Strengthen technology decisions

Support architecture, cloud, data, cybersecurity and technology planning.

From a specific integration to a complete digital transformation programme.

ONE PARTNER. FROM STRATEGY TO EXECUTION.

We combine business thinking, technology leadership and engineering capabilities to move initiatives from idea to implementation.

Strategy & Advisory

- Digital transformation
- AI readiness
- Data strategy
- Process discovery
- Technology roadmap

Technology Leadership

- Fractional CTO
- IT governance
- Architecture
- Cybersecurity
- Cloud strategy

Digital Execution

- Custom software
- Mobile & web
- AI automation
- Integrations
- Data & analytics
- Cloud / DevSecOps

Strategy → Governance → Execution

Strategy defines the direction. Governance protects the investment. Execution creates the result.

SUCCESS STORY

PROCESS DISCOVERY & DOCUMENTATION

The Challenge

Organizations needed to understand, structure and document their current processes before implementing ERP platforms, custom software or new digital solutions.

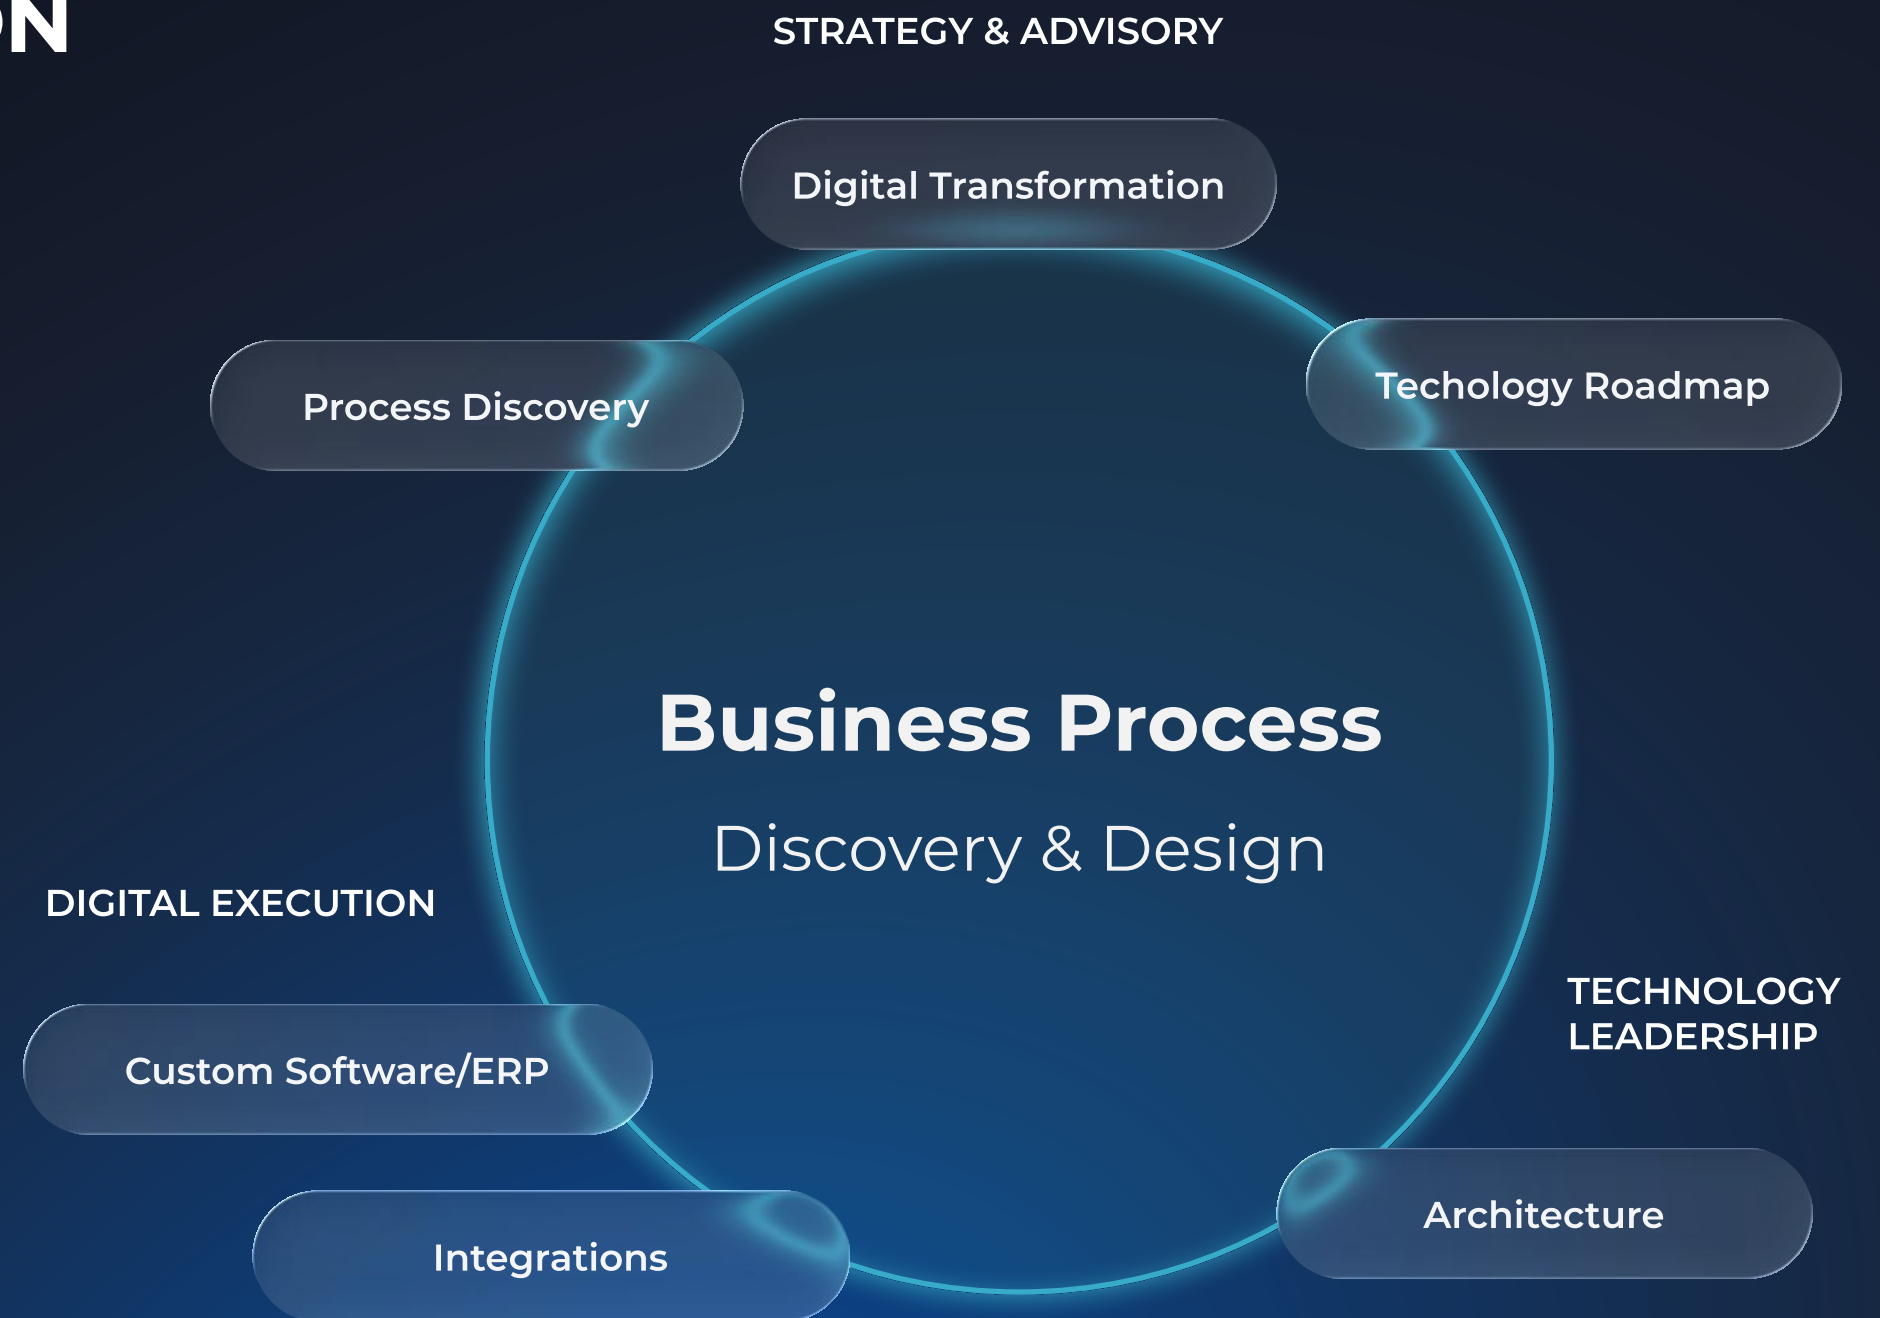

Our Approach

We work directly with business and operational teams to understand how work is actually performed.

- Process discovery & shadowing
- Business rules & requirements
- Current-state process mapping
- User stories for implementation

Business Value

We work directly with business and operational teams to understand how work is actually performed.

Clients:

SUCCESS STORY

TECHNOLOGY CAPACITY & STAFF AUGMENTATION

The Challenge

Organizations needed additional technology capacity to execute projects, strengthen internal teams or access specialized expertise without expanding permanent headcount.

Our Approach

We provide technology professionals who integrate directly into client teams and ongoing projects.

- Software Developers
- Technical Specialists
- Cybersecurity Professionals
- Flexible team extension

Business Value

Additional delivery capacity without building an entire team from scratch.

Clients:

Specialized technology talent, ready to integrate and deliver.

SUCCESS STORY

COMMERCIAL & OPERATIONAL WORKFLOW AUTOMATION

Turning business data into coordinated, traceable action.

The Challenge

Operational and commercial activities were distributed across different systems, making task generation, assignment, follow-up and traceability difficult.

Our Approach

We build solutions that connect existing business systems with operational tools to automate how tasks are created, assigned and monitored.

Business Value

Connected workflows with better visibility and operational traceability.

Clients:

SUCCESS STORY

DIGITAL LEARNING AT SCALE

Scalable learning experiences for distributed audiences.

The Challenge

Organizations needed to train large and geographically distributed audiences while reducing dependence on travel, physical infrastructure and in-person sessions.

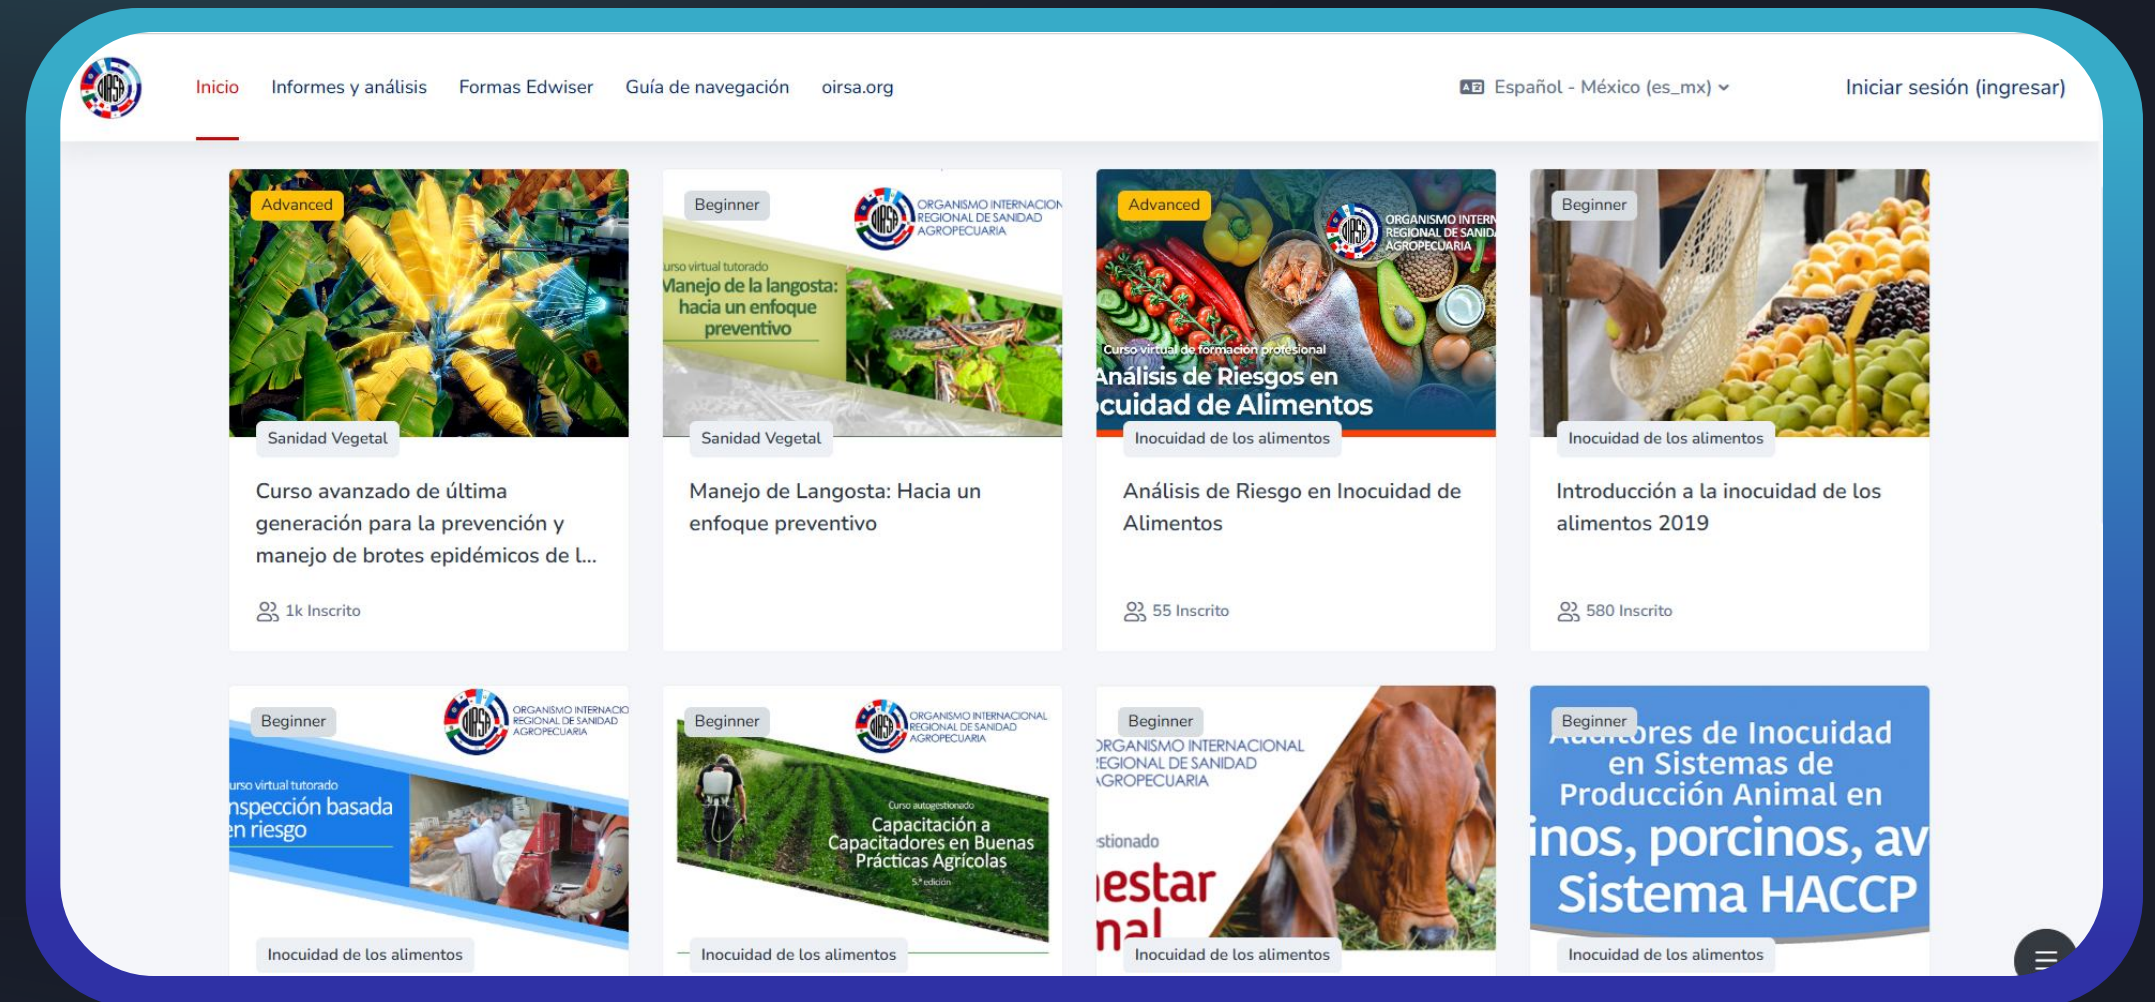

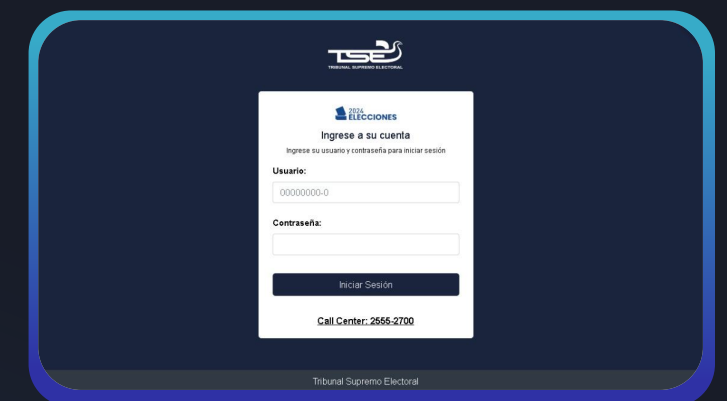

Our Approach

We design and implement virtual learning environments that centralize training, users, evaluations and learning progress.

Business Value

Structured, measurable and scalable digital training.

MORE THAN SOFTWARE DEVELOPMENT.

We bring together business understanding, technology leadership and engineering execution in one team.

Business first

We understand the business before designing the solution.

Flexible Engagement

Advisory, projects, staff augmentation and long-term partnerships.

End-to-End Delivery

From discovery and strategy to implementation and support.

International Delivery

Experience delivering solutions across the Americas and Europe.

Nearshore Talent

Specialized engineering capacity from Latin America.

Cloud & Technology Ecosystem

Cloud, architecture, integrations and modern technology ecosystems.

CODE CASTLE

What could technology improve in your business today?

Tell us where your business is today, what is slowing it down and where you want to go. We'll help you identify the technology path forward.

Let's talk about your next challenge.
