

ZIRCONTech

A TRUSTED PARTNER FOR THE TECHNOLOGIES DRIVING THE FUTURE

ABOUT US

We love technology

We are a group of passionate about technology. For more than twenty years we have participated in challenging projects forming multicultural groups distributed in different countries, always working with state-of-the-art technology.

In recent years we decided to join efforts to accompany multiple companies in the way of digital transformation. We have put our focus on Blockchain and IoT, but our experienced team of engineers is able to develop any type of application and carry out the most complex projects, designing and developing the technological solution from start to finish.

WHAT WE DO?

Our expertise

BLOCKCHAIN

We build solutions on private and public blockchains. Over the last years, we have built several blockchain applications. Our expert team of blockchain developers take care of the full development stack, from deploying nodes and writing smart contracts to front end development and graphic design.

IoT

Our experience in development and open source tools, position us with the experience needed to handle all kind of new digital connected devices.

We can also manage connection between sensors and backend services through devices or hardware using different approaches from custom made hardware to integration with third party providers.

MOBILE & WEB APPS

We build Mobile and Web Apps using most widely-spread technologies.

Leveraging on our experience in Agile Methodologies, cross-industries knowledge, and a combination of both state-of-the-art and traditional UI tactics, ZirconTech provides clients with amazing Apps helping them to excel in their digital strategy.

WHAT WE DO?

Our expertise

CLOUD

Working with Cloud platforms for many years, we developed the expertise and framework to deliver Consultancy services for cloud adoption strategy, application transformation, and support. Our experience includes Amazon Web Services, Microsoft Azure, Google Compute Platform, IBM Bluemix and OpenStack (including, IaaS, Containers, Serverless technologies among others).

SCALABLE PLATFORMS

Our experience in development and open source tools, position us with the experience needed to handle all kind of new digital connected devices. We can also manage connection between sensors and backend services through devices or hardware using different approaches from custom made hardware to integration with third party providers.

TECHNOLOGIES & OTHERS

Ready to work with you

BLOCKCHAIN

Consulting: use cases and architecture using Ethereum, Hyperledger, Corda, Bitcoin, RSK or Quorum.

Software development for blockchain applications and smart contracts. Smart contracts auditing, code reviews, security assessment

SOFTWARE DEVELOPMENT

Technologies: Node, Java, PHP, Mobile (iOS & Android), Clojure, MySQL, PostgreSQL, SOLR, Oracle, React, AngularJS, Bootstrap, Foundation. Cloud computing: Amazon Web Services, IBM Cloud, Microsoft Azure. Project Managers, Scrum Masters, Developers (junior, mid-level, senior), Testers, UI/UX

AGILE METHODOLOGIES

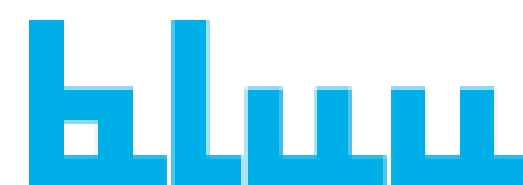

Our execution strategy incorporates proven methodologies, highly qualified personnel and a highly responsive method to manage deliveries. We try to achieve the objectives of the project through early and continuous deliveries of software that will add value. Software that works with the shortest possible interval between deliveries will be delivered.

GREAT FLEXIBILITY

We adapt to the way of working of the clients, their tools and their form of payment. We work both at fixed price and time & materials.
