

#Breaking Paradigms

# What we can do for you

#BREAKING PARADIGMS

*"Our goal is to accompany your business by providing technological solutions with criteria, making your challenges, ambitions and objectives our own, promoting healthy growth so that your company become more profitable and last in time."*

# ¿Why ITSense?

## **Our company**

ITSense has lead the digital transformation process in several companies of diverse industries with high impact results for our clients.

## **Our results**

Without losing focus on the business, optimizing processes, directly impacting revenue and reducing operational costs with high-value deliveries, we have left our mark on our clients.

## **Our team**

This is the most important project of our company. Having each of our team members not just prepared but willing, guides us to warranty results increasing our standars constantly.

## **Our commitment**

We are committed to the industries, aware that digital transformation, aligned to strategic plans, requires a high performance team oriented to results.

## **Industries**

At ITSense we have extensive know-how in the business models of these industries:

- Cooperative
- Financial
- Health
- Agriculture and livestock
- Retail
- Telecommunications
- Education

## **Our certifications**

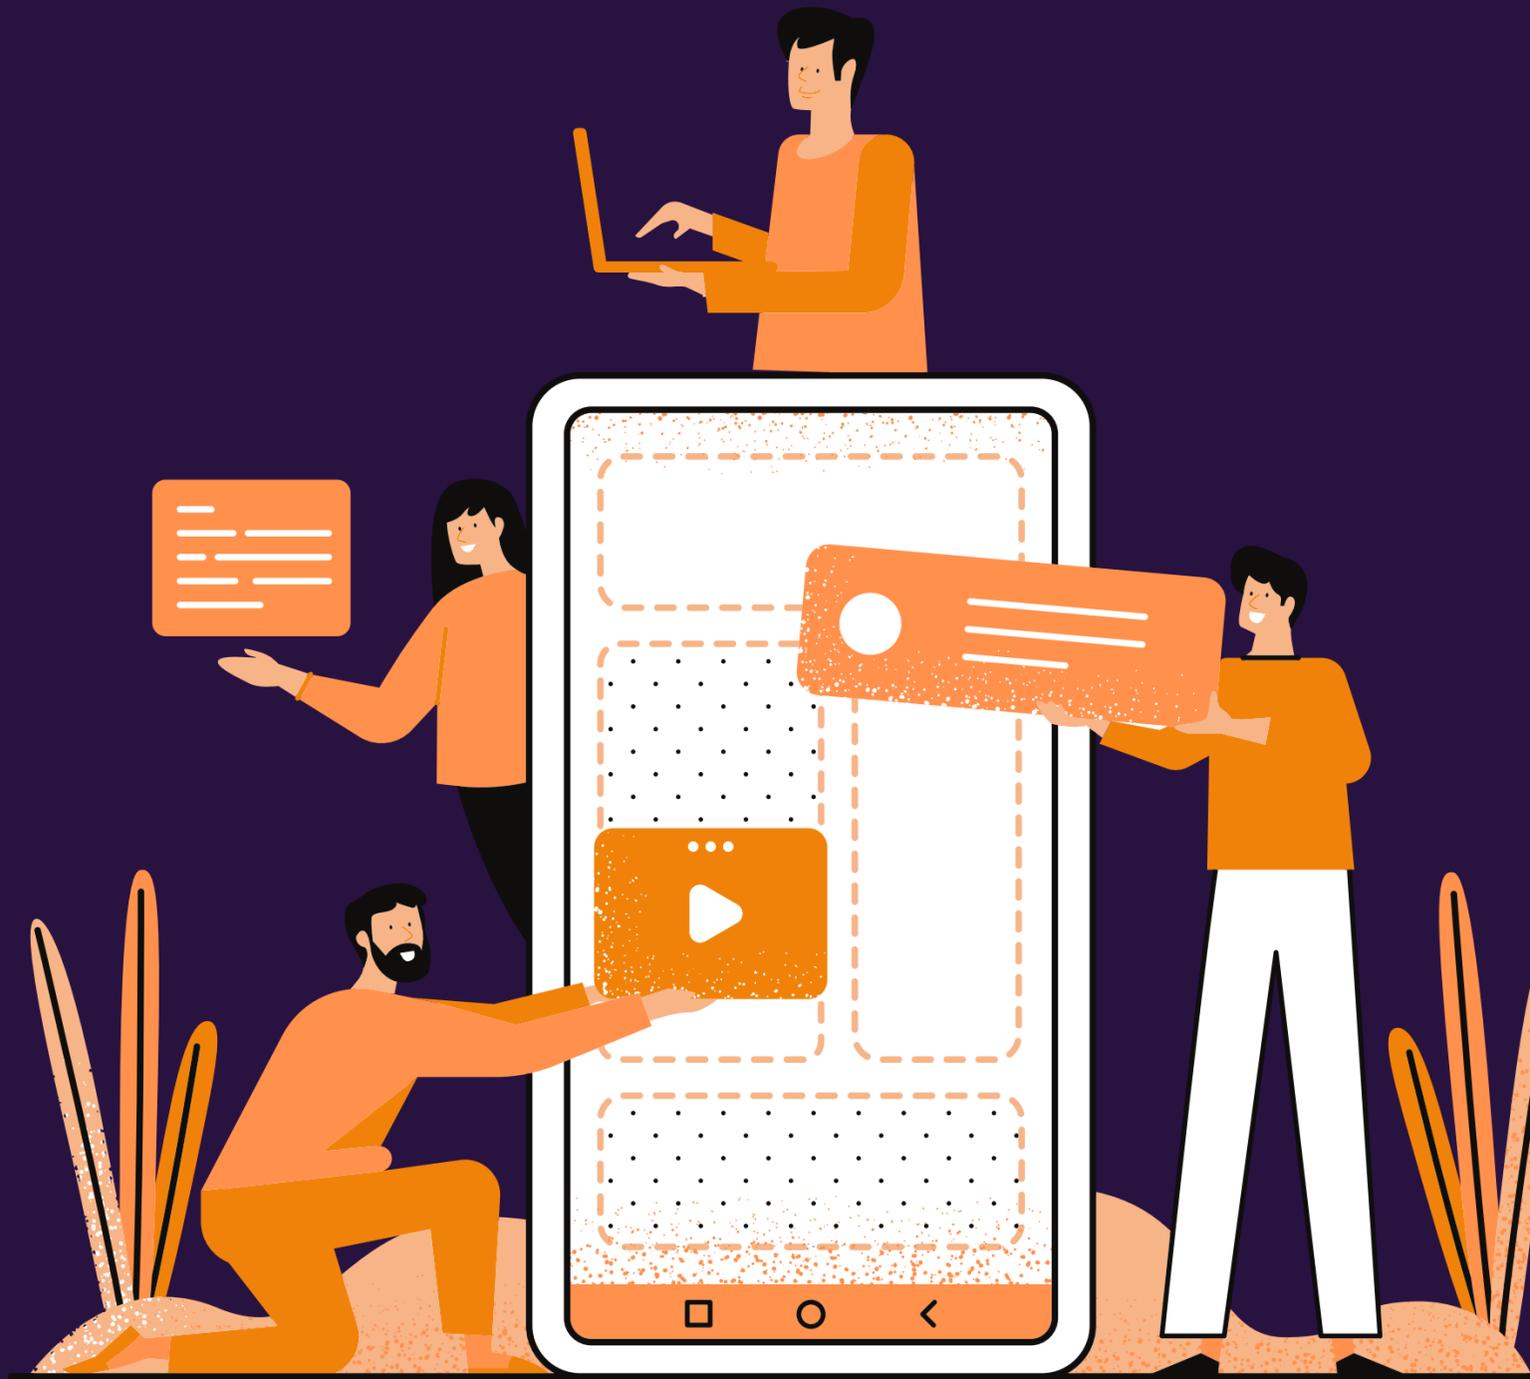

We are a certified Partner of Google Cloud Platform and Amazon Web Services in Machine Learning and Cloud Architecture tools.

- IoT
- Data Mining

**ITSense**

Academy

- Implementation of Agile Mindset
- Certifications
- Workshops
- Consulting

**ITSense**

Innovation

- Analyzer Services
- Moonshot EBS
- YoLeHago

# Our experience

## Digital Transformation & Co-Innovation Labs

We co-innovate with our customers, integrating technologies and production processes to develop innovative MVPs.

## Software Architecture and Application Integration

Adoption of Integration platforms: APIs, ESBs and Microservices. In collaboration between our team and our client's teams to implement integration platforms.

## Big Data, BI & Data Management

Reliable information is needed to make good decisions. We provide business solutions, through the design and implementation of analytical databases, oriented to the optimization of decision making.

## Web App & UX/UI

We seek to generate positive emotions in users and transform both their behavior and the trust they project towards brands, providing a comprehensive digital experience.

# Our experience

## Security

We secure the most important asset for companies: "Information". We help organizations to achieve their security objectives, minimizing the risks on the business operation.

## Cloud Strategies & DevOps

We challenge ourselves and our clients to develop and implement an efficient Cloud strategy ensuring agility and efficiency.

## Mobile App

We develop applications for iOS and Android platforms for smartphones and tablets. We design our architectures to support multiple channels within the ecosystem of web, mobile and cloud solutions.

## IOT & Automation

We have experience in the development of embedded solutions that connect the user experience and technological devices, transforming us into digital citizens.
