Building Communities Intelligently

## **ABOUT US**

Avoor Yafe Group (Guyana) Inc. is a premier technology solutions provider specializing in intelligent infrastructure, global connectivity, and advanced tracking systems. Founded on the principle of "Building Communities Intelligently," we bridge the gap between technology and practical business applications through our comprehensive suite of end-to-end solutions. What distinguishes us is our unique partnership approach—we collaborate closely with clients to understand their specific goals and operational environments, delivering solutions that meet immediate needs while positioning them for sustainable growth in an increasingly connected world.

Our services span e-infrastructure, global connectivity, eSIM technology, smart logistics, smart agriculture applications, and training, each delivered as a turnkey package ready for immediate implementation across manufacturing, transportation, shipping, tourism, security, and retail sectors. We define our success by the tangible improvements we deliver—whether through enhanced efficiency, reduced costs, improved security, or new revenue opportunities—and invite you to explore how our intelligent solutions can transform your business operations and help achieve your strategic objectives.

**A strategic partnership that delivers a refined and anticipated outcome for our clients.**

## Services

### Smart Label

World's lowest power autonomous industrial asset tracker

Innovative printed battery device with a unique form factor. All components can be recycled.

- Set geofences to receive notifications when your shipment arrives at or leaves key points in the supply chain.
- Leverage the data transmitted by the label sensors including, but not limited to, monitoring the temperature of perishable products.
- The label can be used again after the first journey, providing there is still enough battery.
- The printed battery is designed to keep the label as light as possible. Depending on the set configuration, the label can send up to 150 messages.
- The label is power-optimized to prolong its lifespan, and communicates via low power LTE-M networks.

#### Small

Ultra-thin form factor and printed battery for minimal weight. Adhesive layer for easy application to any surface.

#### Smart

Enabling new use cases with the sensors and intelligent middleware in this unique form factor.

#### Safe

Receive notifications when the shipment enters key points along the supply chain and when the label has been broken.

## Global Connectivity

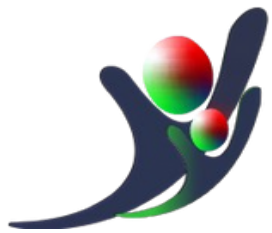

## Smart Agriculture

## Smart Logistics

A strategic partnership that delivers a refined and anticipated outcome for our clients.

# Mobile Gateway

Best-of-class movement tracking – long-lasting, maintenance-free, field-proven

### Intelligent Battery Management

- Solar-based energy harvesting Unique
- solar charger intelligence Sustainable
- battery-recharging Life span and
- endurance maximization High
- capacity Li-Po rechargeable

### IP69k Casing

- IP69k, extremely robust and long-lasting
- Very compact: approx. 260 \* 100 \* 30mm  
10.24 \* 3.94 \* 30 inches
- Optional: only 23mm / 0.8high (!)
- Fully ruggedized – designed for harsh conditions
- Variable mounting options □ e.g. click holder
- Optional vandalism protection by Polycarbonate

Example: click holder with optional  
mount sensor □ total height  
32mm

Example: anti-tree click holder  
total height only 30mm

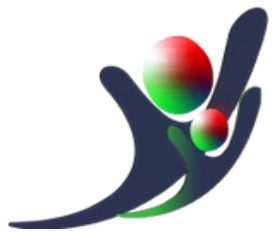

### Positioning and Data Transmission

- Reliable GPS-, Cell-ID tracking (optional  
Glonass, Galileo)
- 4G catM1 (LTE-M) / fallback 2G Option:
- Standard-BLE or MESH-IoT-BLE

### Modular Design

- Designed to tackle challenges of  
varied physical requirements
- Freely definable inside components
- Optional auxiliary equipment
- Optional additional sensors
- Temperature
- Humidity
- Shock
- Crane-lifting
- etc.

## **Avoor Yafe Group (Guyana) Inc. Value**

- Uniqueness - We prioritize outcome quality and seek continuous improvement.
- End-to-End Solution - We manage solutions from supply through maintenance.
- Turnkey Solution: A ready-made product or service that is fully developed, implemented, and ready for immediate deployment.
- Commitment to the growth and development of our clients

A strategic partnership that delivers a refined and anticipated outcome for our clients.

# E-Infrastructure and Intelligent Infrastructure

Brief Description: Advanced network solutions providing the foundation for secure, reliable, and high-performance digital operations through both structured and wireless networks.

## Key Benefits:

- Enhanced operational reliability with 99.9% uptime guarantee
- Simplified network management through centralized controls
- Future-proof scalability to accommodate business growth
- Reduced IT operational costs through efficient resource utilization

## Unique Differentiators:

- Custom-designed network architecture tailored to specific industry requirements
- Integration capabilities with existing legacy systems
- Proactive monitoring with predictive maintenance alerts
- Vendor-agnostic approach ensuring best-fit solutions

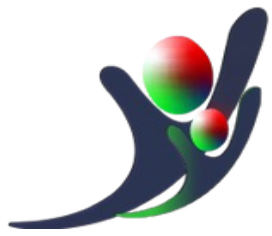

## Potential Applications:

- Enterprise-wide network deployments
- Industrial IoT connectivity platforms
- Secure remote access solutions
- Multi-site business connectivity

**A strategic partnership that delivers a refined and anticipated outcome for our clients.**

**Avoor Yafe Group (Guyana) Inc.**  
Building Communities Intelligently

## Global Connectivity

**Brief Description:** Seamless connectivity solutions extending to over 150 countries, enabling businesses to maintain reliable communications regardless of geographical boundaries.

### Key Benefits:

- Consistent connectivity experience across global operations
- Simplified billing and management through a single provider
- Reduced international communication costs
- Enhanced workforce collaboration across borders

### Unique Differentiators:

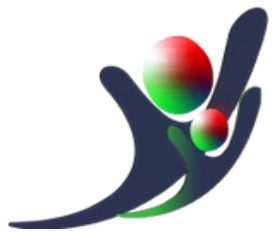

- Regional expertise with local compliance knowledge
- Redundant connection paths ensuring business continuity
- Flexible bandwidth allocation adapting to usage patterns
- Unified security protocols across all connection points

### Potential Applications:

- Global supply chain management
- International business expansion
- Remote workforce enablement
- Cross-border data management

**A strategic partnership that delivers a refined and anticipated outcome for our clients.**

**Avoor Yafe Group (Guyana) Inc.**  
Building Communities Intelligently

## eSIM Solution

**Brief Description:** Next-generation cellular connectivity that eliminates physical SIM cards, allowing for remote provisioning and management of multiple mobile network operators.

### Key Benefits:

- Up to 60% cost reduction on international roaming
- Instant network switching without hardware changes
- Centralized management of all connected devices
- Enhanced security through digital authentication
- 

### Unique Differentiators:

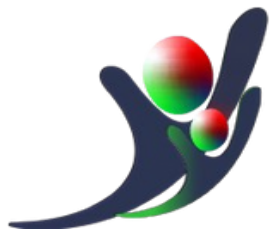

- Seamless multi-carrier integration through a single platform
- Automated carrier selection based on signal strength and cost
- Advanced usage analytics and optimization recommendations
- Remote diagnostics and troubleshooting capabilities
- 

### Potential Applications:

- International business travel connectivity
- IoT device fleet management
- Transportation and logistics tracking
- Remote workforce enablement

**A strategic partnership that delivers a refined and anticipated outcome for our clients.**

**Avoor Yafe Group (Guyana) Inc.**  
Building Communities Intelligently

## Smart Logistics

**Brief Description:** Comprehensive tracking and monitoring solutions that provide real-time visibility throughout the supply chain using advanced IoT sensors and geofencing technology.

### Key Benefits:

- Up to 30% reduction in lost or delayed shipments
- Real-time condition monitoring preventing product damage
- Enhanced inventory accuracy and planning capabilities
- Improved customer satisfaction through accurate delivery estimates
- 

### Unique Differentiators:

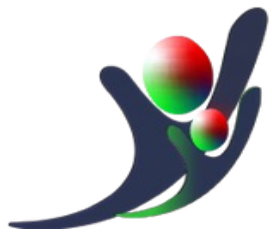

- Reusable tracking labels reducing environmental impact
- Low-power LTE-M networks extending battery life
- Multi-parameter monitoring (temperature, humidity, shock)
- Integration with existing warehouse management systems
- 

### Potential Applications:

- Cold chain monitoring for pharmaceuticals and food
- High-value asset tracking
- Just-in-time inventory management
- Multi-modal shipping visibility

**A strategic partnership that delivers a refined and anticipated outcome for our clients.**

**Avoor Yafe Group (Guyana) Inc.**  
Building Communities Intelligently

## Smart Agriculture

Brief Description: Integrated technology solutions combining sensors, robotics, and AI to optimize farming operations, increasing yields while conserving resources through data-driven decision making.

### Key Benefits:

- Up to 25% increase in crop yields
- 30-50% reduction in water usage
- Minimized chemical applications through precision targeting
- Early disease and pest detection reducing crop losses
- 

### Unique Differentiators:

- Customized deployment for specific crop types and environments
- Soil-to-sale traceability capabilities
- Weather-adaptive recommendation systems
- Integration with existing farm equipment
- 

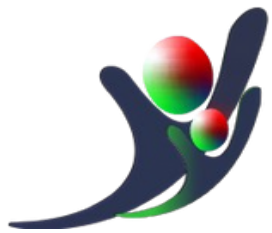

### Potential Applications:

- Precision irrigation management
- Automated crop monitoring and disease detection
- Livestock tracking and health monitoring
- Harvest optimization and yield prediction
