

WHO WE ARE AND WHY TO USE PERSONALIZED GENETIC TESTING (PGT) LABORATORY

- Highly trained and experienced staff with over 25 years experience in the clinical industry and Molecular Testing.
- We have processed more than 2000 samples of Pharmacogenetic Testing.
- Advanced high-throughput technologies ensure accurate, reliable, and timely results. We use Thermo Fisher's platform: Quantstudio 12K flex system and TaqMan® SNP Genotyping Assays by Real Time PCR technology allow the process from DNA extraction to Genotyping to be done in a easy workflow until report is delivered.
- PGT handles all insurance billing (Medicare or private).
- Displays drug-specific guidance and easy interpretation using Gene Dose Genetic Response Report® and Gene Dose Live® from Coriel Life Science.
- Laboratory meets or exceeds all relevant accreditations: Commission on Office Laboratory Accreditation (COLA)# 27163, CLIA #10D2118173 and AHCA # 8000288448

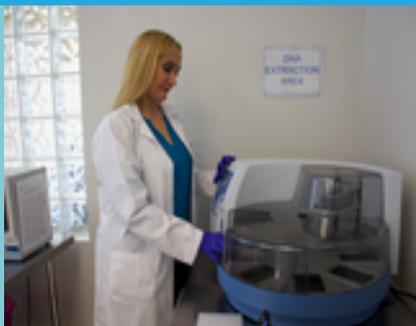

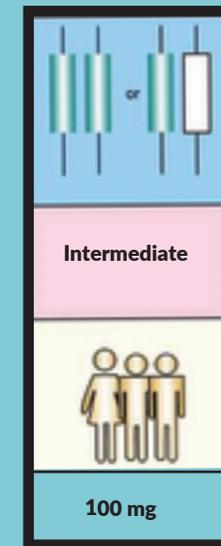

Precision medicine will give doctors an invaluable tool to provide their patients with the right drug and exact doses according to their genetic constitution.

This will translate into safer, efficient and rapid recoveries with no need for costly hospitalization. It also dramatically reduces malpractice events that may bring about liability lawsuits. PGx avoids a lengthy trial and error process for treatments and medicines, as well as any possible malpractice and its legal consequences.

BEFORE: One-dose-fits-all approach

AFTER: Personalized Medicine, From Genotype to phenotype

Why order a Pharmacogenetic Testing?

- Decrease the risk of adverse drug events (ADEs) and treatment failure.
- Minimize the negative side effects of treatments.
- Improve patient care.
- Determine the best dose of a medication is for you
- Direct the selection of optimal therapy and reduce trial-and-error prescribing.
- Decrease costs and time to the patients.
- Simplicity of Testing: Test performed on simple Buccal Swab samples.
- PGx is recognized as an indispensable tool for “precision medicine” in healthcare.

When to order a Pharmacogenetic Testing?

Some of Common Reasons to Test:

- Use of Coumadin® or Plavix®.
- Pre-operative.
- Family history of thromboembolism.
- Active cardiovascular disease.
- Not responding as expected to drug therapy.
- Current or previous adverse drug reaction.
- Chronic use of multiple medications (4 or more).
- Treatment resistant in patients medicated for depression or anxiety.

TESTING KIT

- PGT provides kit test and Requisition Form.
- Please contact our customer service at: info@pgenetic.com or 305-978-8590 Fax: 786-221-4170

SPECIMEN COLLECTION AND SHIPMENT

- Please mail Test Requisition Form and two buccal swabs samples from each patient in the self-addressed envelope or print the label at pgenetic.com

REPORT

- PGT strives to provide a complete report within seven business days of receiving the sample.
- Report could be see online.

12855 SW 132 ST, Suite 101 Miami, FL 33186

What is Pharmacogenetic testing?

Pharmacogenetic Testing (PGx) is the relation between a patient's inherited genetic makeup and their personal and unique response to pharmaceutical drugs.

What are the PGx Goals ?

- Avoid Adverse Drug Reactions
- Maximize Drug Efficacy
