

Bancoli

Fintech-first international invoice, payment and banking platform, optimizing supply chain efficiencies across multiple businesses and industries

Benefits

Strengthen your supply chain financing capabilities and earn yield on every invoice. Speed up payments and improve cash flow and working capital.

Yield generation

Generate attractive returns by simply paying invoices.

Free invoicing

Invoicing directly to your client's bank account encourages timely payments and reduces friction and manual errors.

Free payments

Send or receive free payments with Bancoli's trusted and verified business network.

Impact

Due to the nature of our platform, any company seeking to strengthen its supply chain financing, invoicing system, and payment platform would benefit from Bancoli. However, our product uniquely benefits small to medium enterprises (SMEs) looking to improve supply chain relationships, improve cash flow, and boost their growth.

Transact with the world

Part of our mission is to positively impact communities by facilitating the payment process between buyers and sellers in the 130 countries where we work today.

In many parts of the world, SMEs cannot access loans or obtain working capital. In many cases, negotiated payment times are so long that they negatively affect the business's liquidity. Bancoli helps SMEs solve these issues.

Being part of the US financial system, we have the endorsement of our banking partner Olibank, which is regulated by the U.S. Government, thus generating confidence and security for our customers.

Solutions

USD Business Bank

Get the smartest USD account for your business

Store, send, and drive yield on your USD transactions with a global Bancoli account.

Ease of doing business

Bancoli USD accounts are business accounts that are held under U.S. federal laws and regulations. Since they are held in the United States, FATCA does not apply.

Backed, up to \$125M per depositor

Unlike with legacy bank accounts, funds stored in your Bancoli accounts are fully-backed by U.S. Government notes, up to \$125 million per account.

Solutions

Invoicing

Bulletproof invoicing

E-invoicing directly to your clients' bank accounts. Eliminate manual processes and PDFs that end up in clients' spam folders.

Eliminate card processing fees and chargebacks

Eliminate costly credit card processing fees with Bancoli's patent-pending guaranteed invoices. Offer a small discount for an early invoice allocation and secure your future receivables.

Single source of truth

Eliminate manual invoicing mistakes and payment delays. Allow your buyers to automatically allocate to your invoices with a single click of a button.

Solutions

Cashflow Management

Maximize cash flow with guaranteed invoices

Bancoli's supply chain financing platform is built for immediate liquidity. Tap into liquid funds and increase cash flow efficiency.

Strengthen supplier relationships

Nothing makes suppliers happier than reliable payments that are always on time (or early). Become the favorite client.

Eliminate errors and wasted time

Minimize human error and supply chain disruptions by automating your invoicing process.
