## One World Wines

We are a “family” of producers, winemakers and wine businessmen in love for viticulture and for the ideal of sharing Life through each wine made. After the beginning of Lidio Carraro brand internationalization - elaborated of World Class Wines in different terroirs besides Brazil based on the Purist Philosophy - we were challenged to develop other worldwide projects, adding all technical expertise, market experience and especially the values and the passion that move us for the biggest cause, that transcends the business itself. So was born ONE WORLD WINES - We are One: A project engaged to fulfill with excellence and sustainability of our partners requirements and moved to the cause to impact and change the life of millions of people. 10% of the net income of these wines are designed to Faces in the World Institute, that it is a non-governmental organization, catalyst of resources based on the concept of collaborative economy, to provide some of the more latent needs of the human being in our current society and the rescue the principles as “Family” base, its support and development for enforcement of the purpose along generations.
