GO **FOR**
GROWTH

An isometric illustration of a digital cityscape. It features several blue and white geometric shapes representing buildings. On top of these buildings are various tech-related icons: a laptop displaying a video player, a smartphone, a tablet showing a line graph, and a person standing next to a large screen displaying a line graph. The background is a gradient of blue and white, with some faint dotted lines.

About Us

We are a company driven by results and value. We are committed to delivering best-in-class enterprise software solutions to our clients. As an enterprise software development partner, we closely study our client's needs and wants, then analyze them to craft a solution through enterprise software.

As a software solutions provider, we will thoroughly study your requirements and suggest technologies that can help to craft digital solutions and which can also help you boost your business. Our best resources keenly craft your software needs and ease up your enterprise work-flow.

Values That Drive Us

Integrity

Integrity is the most important business ethics, and we are driven by such business ethics. When it comes to taking a standard, neutral and professional decision, we always follow our moral values and integrity.

Commitment

We always have to stick to our commitments no matter what. Our commitment and fulfillment is what we are proud of. Once we have committed to our client, we always try to fulfill it. We know the value of commitments.

Innovation

Without any new ideas or suggestions, no business can run. Inexture has a huge staff who continuously works to achieve and innovate things and comes up with ideas that create a difference. As of being a software solutions provider, we always encourage innovative ideas and implement them.

Accountability

As software solution providers, we are responsible for every line of code we write, so it is our duty to take care of everything we deliver. So, we always make sure that anything we deliver is well tested and gives the best throughput.

How We Do it

Data Security

We know how important and confidential is any data. And we do our best to protect the data that comes to us. Our offices are equipped with bio-metrics security and systems are protected with the best antivirus and antimalware software. Each piece of code we write is backed up and stays confidential. We also sign NDA policy, so all of your data is secure with us.

- **Biometrics Security**
- **NDA Policy**
- **Code Backup**
- **Antivirus/malware systems**

Pricing Models

Hourly

This is the most popular and budget-friendly pricing model. Most clients with a limited budget choose this pricing model. They pay for the resources they hired and how much they work.

Fixed Cost

This pricing model serves you with a fixed milestone delivery at a particular cost. This model does not include any hourly rates or per-resource cost calculation. The client pays for only the milestones he/she wants to be developed.

On-Site Development

This type of model is a little bit expensive than the other models, but the client who want excellent results and seamless communication with the developers, choose this model. This might cost a little more but, it gives the client the most satisfaction for what he/she pays for.

Dedicated Resource

If you want a dedicated developer to work for you full-time, then you can choose this dedicated resource plan. In this model, you can hire a dedicated employee working only for your project, in our office premises. It is the best option when you want to hire a long term employee.

We are INEXTURE

Tech Geeks

You will find tech geeks in our office. A LOT OF.
They keep messing with new technologies and a lot of codes!

Creative Minds

We welcome all ideas and suggestions from our family members (employees, right!). So you will get a lot of creative suggestions!

Thinkers

We are not just a bunch of coders. We think thoroughly before planning or implementing anything. And that's the important thing!

Doers

All other qualities are in vain if you don't do anything. So apart from being tech geeks, creative and thinkers, we are doers. We do craft solutions for your business.

Our Products

Politician Digital Platform

Door-to-door campaigning is so 2019! Our digital campaigning platform totally eliminates the traditional door-to-door political campaigns. With our new app, politicians can avail hassle-free digital campaigning services.

Business networking platform

With our business networking platform, you can easily promote your business and grow your business circle. This app lets you list your business and products on the app and give your business a super exposure.

Election Digital Platform

We created an app for the Gujarat Legislative Assembly Election 2017, which served information of all the candidates, their past records and other information. It also allows the users to submit their complaints directly and let the politician look on those complaints. We got a lot of media coverage by this app. (Not bragging!)
