

digitalhype®

At **Digitalhype**, we believe talent is a critical asset in this never-ending “Hype of Technology” that will transform our world.

Our goal is to minimize the access gap to Tech Talent connecting companies with Software Developers in Latin America. At the same time, we provide growth opportunities for skilled engineers in developing countries to improve their lives and communities.

Since 2014 we have provided Staff Augmentation Services from our Nearshore Delivery Center.

Nearshore Benefits

Time Zone Proximity and Travel Links.

Cultural Affinity.

USMCA Protections.

Access to TN Visas to move Talent from MX to the U.S.

Cost-effective Quality.

Huge Talent Pool.

Business Cases

Fintech:

We built and transferred a software engineering team that generated a prototype (MVP). We responded to the customer's evolving nature. Over three years, we helped adapt the product to the different scenarios and business models. We assisted the customer build a nearshore PowerApps / MS Dynamics development team to maintain and test a top-notch ERP for Leasing Companies.

Semiconductors:

We advised the customer to build, operate, and transfer (BOT) a CloudOps and DevOps team in charge of developing and managing a platform that integrates IoT Devices using an Edge Wireless Technology (LoRA WAN). We supported install Testing Practices for Web and Embedded Software, Cloud Services, Scaling, and Security.

The People Behind Technology.

What if you pay less for the same talent abroad than in the U.S?

Does your recruitment team have difficulties finding specialized talent in the U.S with an ideal time zone?

Would you like a Scalable Technology team for your growing organization?

Are you planning to expand your business to a Nearshore location?

We discover, recruit, train and manage Remote Software Developers in LATAM, helping fast-growing companies to reduce the impact of tech talent shortage, scaling opportunities up and down while lowering your costs.
