Guanabara Café brings the true flavor of Minas Gerais and comes from the passion that transcends generations for the enchanting coffee aroma.

Located in the Santa Luzia farm in Carmo do Rio Claro country south Minas Gerais, and founded over 50 years ago, we are focused on quality and sustainability in every sector, since tillage to the end consumer in order to provide a premium product without leaving behind the country coffee farmer tradition.

With the purpose of honoring the legacy passed down by previous generations, when you open your package in addition to feeling the incredible sensation of the aroma you will also be sure that your coffee has the unique and exclusive origin made especially for you.

Our entire product on process takes place on the farm and each grain tells a story of work and passion.

We love coffee, which is why we do not allow the product to leave here without meeting the strictest quality standards that brought us here as one of the references in the sector.

Always with high quality products and services, roasting has a specialized structure to meet the demand of the most rigorous markets and coffee consumers in the world.

The farm also contributes to sociocultural development, generating jobs and great opportunities for dozens of families in the region.

A coffee full of history and overflowing with quality, it pleases the people of Minas Gerais and Brazil, but our purpose does not see borders.

Guanabara Café's big dream is to share our passion with other countries and see our coffees in different parts of the world, carrying our history and especially our unmistakable quality.

Selected people, search selected products. Passion that surpasses generations

A special artisanal coffee, produced with Arabica beans, carefully selected from the best lots from the Santa Luzia farm, with a sieve 15 above, medium roast profile. It presents striking gustatory notes, providing flavor and aroma of caramel and chocolate.

Ideal for those looking for a drink with a harmonious finish with an extremely pleasant body and sweetness. Guanabara, the selection of the best grain.

In your next experience with cocoa flavors, we invite you to include Blue Forest products.

Fruit of the dream of two women from Bahia, coming from one of the most traditional families in cocoa production, Blue Forest Cocoa was born thinking globally.

The Delmondes and Gedeon families, owners of farms in the south of Bahia since the beginning of the 20th century, have always grown very high quality cocoa, however, when the tradition was given to our current management, the leap was incredible.

We work with the best of cocoa to produce nibs and derivatives with a high level of antioxidants, thus providing the most incredible sensations to the most varied palates.

The product line includes cocoa nibs, cocoa granules and cocoa nibs praline.

Our process is quite rigorous and once the cocoa beans, processed and selected, are ready, they are lightly roasted, have the outer covering removed, go through a breaking process and, with that, we obtain small pieces that are known as nibs.

Granulated cocoa is ground nibs. The processes are subjected to quality management that results in a cocoa with the antioxidant level preserved, this allows the product to help reduce stress levels, and create a sense of well-being in those who consume them.

And when I say that we think global, we also think about the future of the planet, so we actively work to preserve the Atlantic Forest, with our Conservative Production project, and so we have a product that, in addition to being delicious, is sustainable and does not harm the environment.

Now Blue Forest Cocoa is going strong to take this tasty pleasure to other parts of the world that will get to know the wonderful flavor that only Bahia produces.

We are a small family business that has been dreaming big for 15 years. We are constantly learning and improving our processes to always deliver the best brown sugar on the market, whose quality meets expectations as it is so good. Our focus is to produce well, but with our way, after all, the company has the face of the family and this is the face that we want to expand to the world.

And it's not just our family that we are concerned about, because with 83% raw material and our own production and 23% supplied by more than 15 families, we create an environment which encourages other regional producers for a 100% natural, complete and Brazilian product.

We have:

MANUAL HARVEST

So that there is a selection of any unwanted plants and also cleaning of straw and cutting the tips, which gives greater quality to the final product.

FOOD SAFETY

Processes and equipment that guarantee a product of superior quality and with total food safety, as it is the name of the family that is at stake, so only quality comes from here.

SPECIAL EQUIPMENT

Our Sugar goes through a special and unique mixer which guarantees better standardization and texture. Which is why we are always improving our equipment and production processes.

REPEATED PROCESSES

Repeated processes of sieves and magnetic grids are carried out until reaching the strict quality standard Engenho Santo Antônio.

100% INTEGRAL
all nutrients present in the sugarcane juice are preserved;

100% NATURAL
no addition of chemicals in its production

DEDICATED TEAM

The team is passionate about what they do, but we have a dedicated technical team, with our Agronomist Engineer, Food Technician, among others.

We follow all production standards, sanitary legislation, after all, passion and dedication are not enough, it takes a lot of technical investment to reach the apex of quality.

The next step is to take this small family business to take a big leap forward and take the best brown sugar to every corner of the world.

New technologies without losing our traditions, 15 years improving every day and expanding throughout Brazil.

ABOUT US

THE EXPERTISE THAT WAS MISSING FROM YOUR PRODUCT

The project was created with the goal to transform the way that the foreign trade market approaches the small and medium producers in Brazil. They suffer with a lack of personalized support with a more accessible cost to sell their products in the international market.

A FRESH LOOK AT THE WORLD

We want to go beyond the stereotypes linked to Brazil and Brazilian products. Besides commercialization, we want to show how these products are connected to HISTORY, CULTURE and TRADITIONS inside our country.

We offer a quality service which helps our clients to understand their market niche, and takes them to an organic growth internationally and that prepares them to walk with their own feet.
