Microsoft Partner

About us

Founded in 2010, iTSystems specializes in software development, AI solutions, Power Platform, and staff augmentation. With over a decade of experience, we deliver scalable solutions tailored to business needs.

Our signature strategy

Our signature strategy is to become one with your company. If you are successful, we are successful.

By achieving your goals and meeting your expectations we are sure we can create a solid and long-lasting business relationship.

Services

Custom Application Development

Data Engineering & Analytics

AI & Generative AI

Microsoft Products Implementation

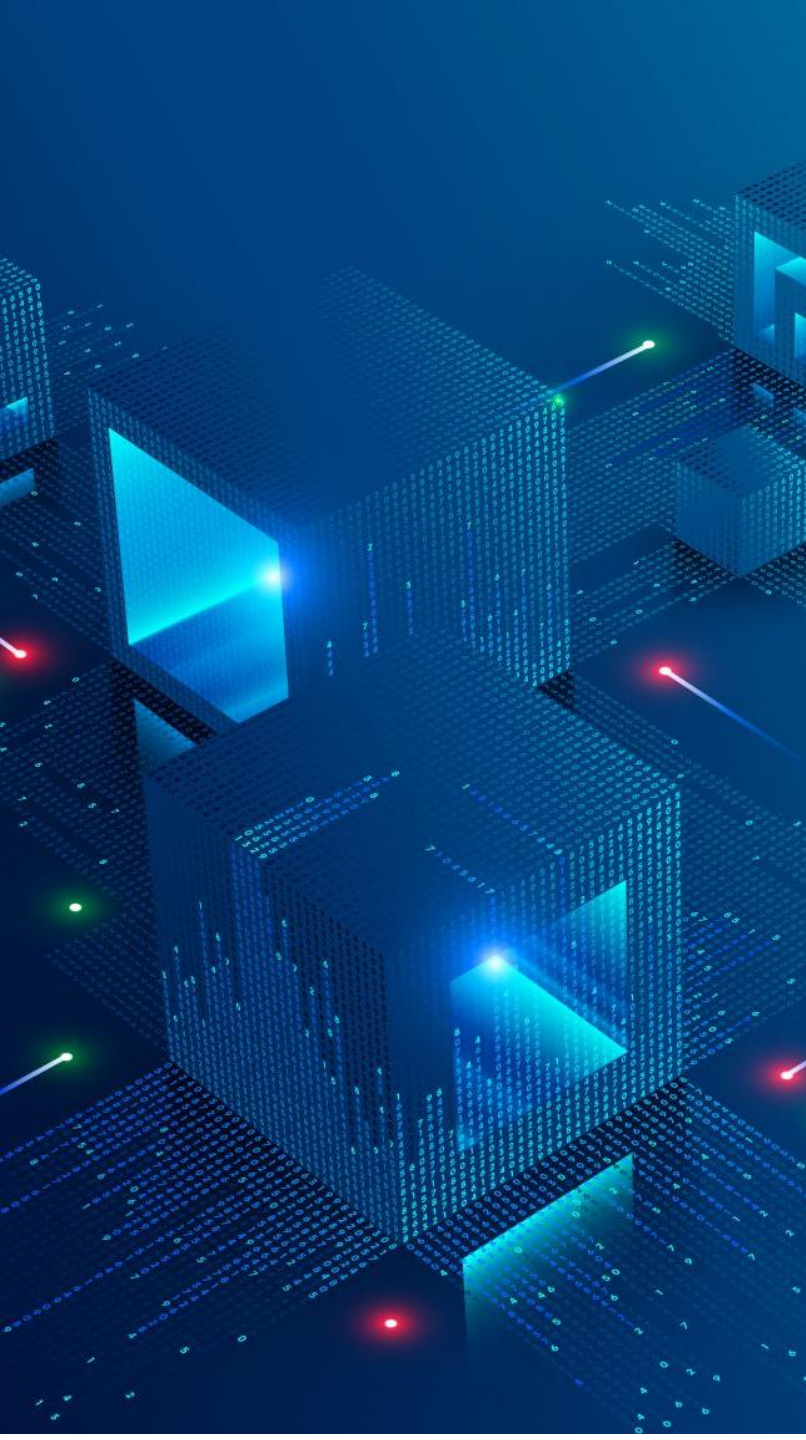

Staff Augmentation

Managed Services

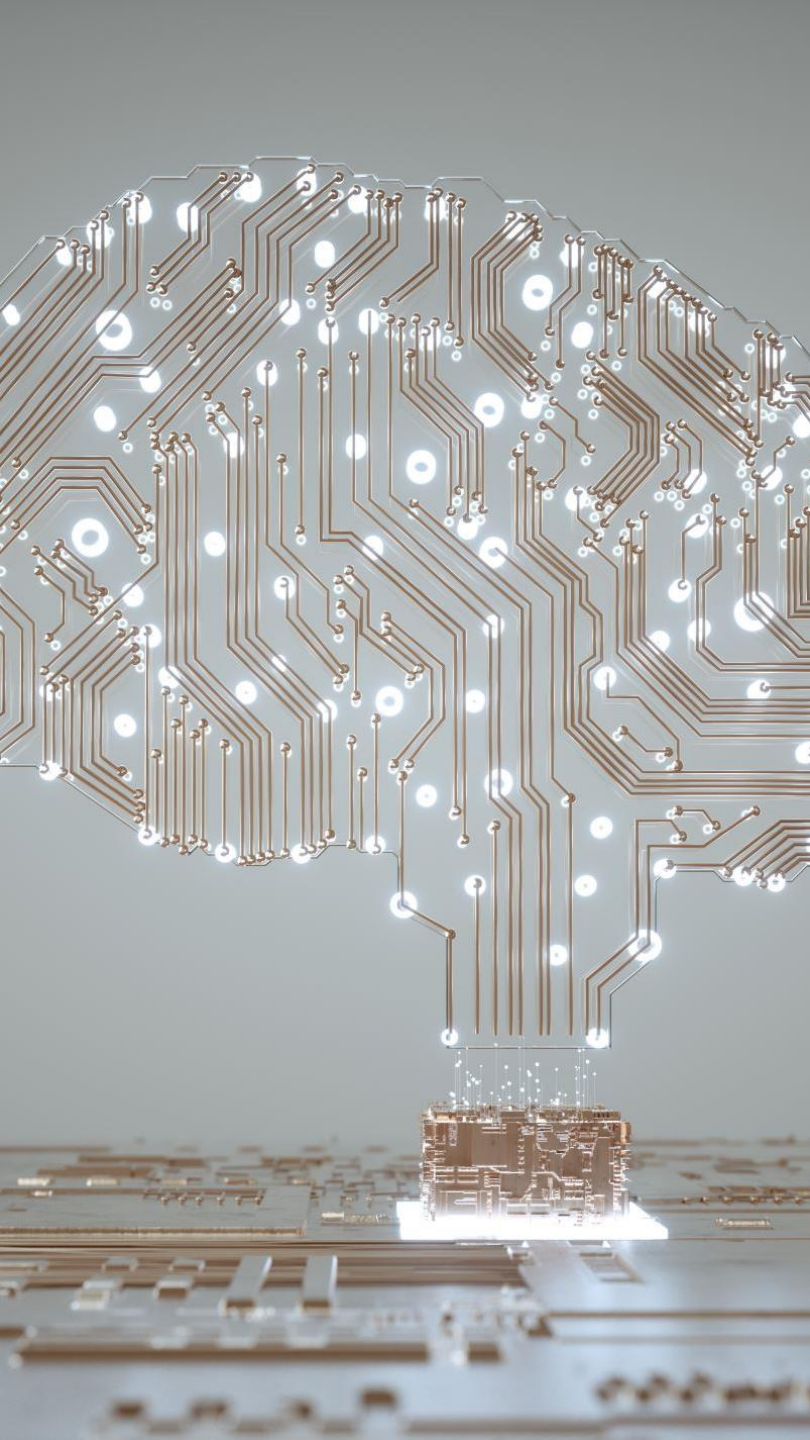

Custom Application Development

Tailored software using .NET Core Blazor, React, Angular, with robust backends in SQL Server, MongoDB, and MySQL.

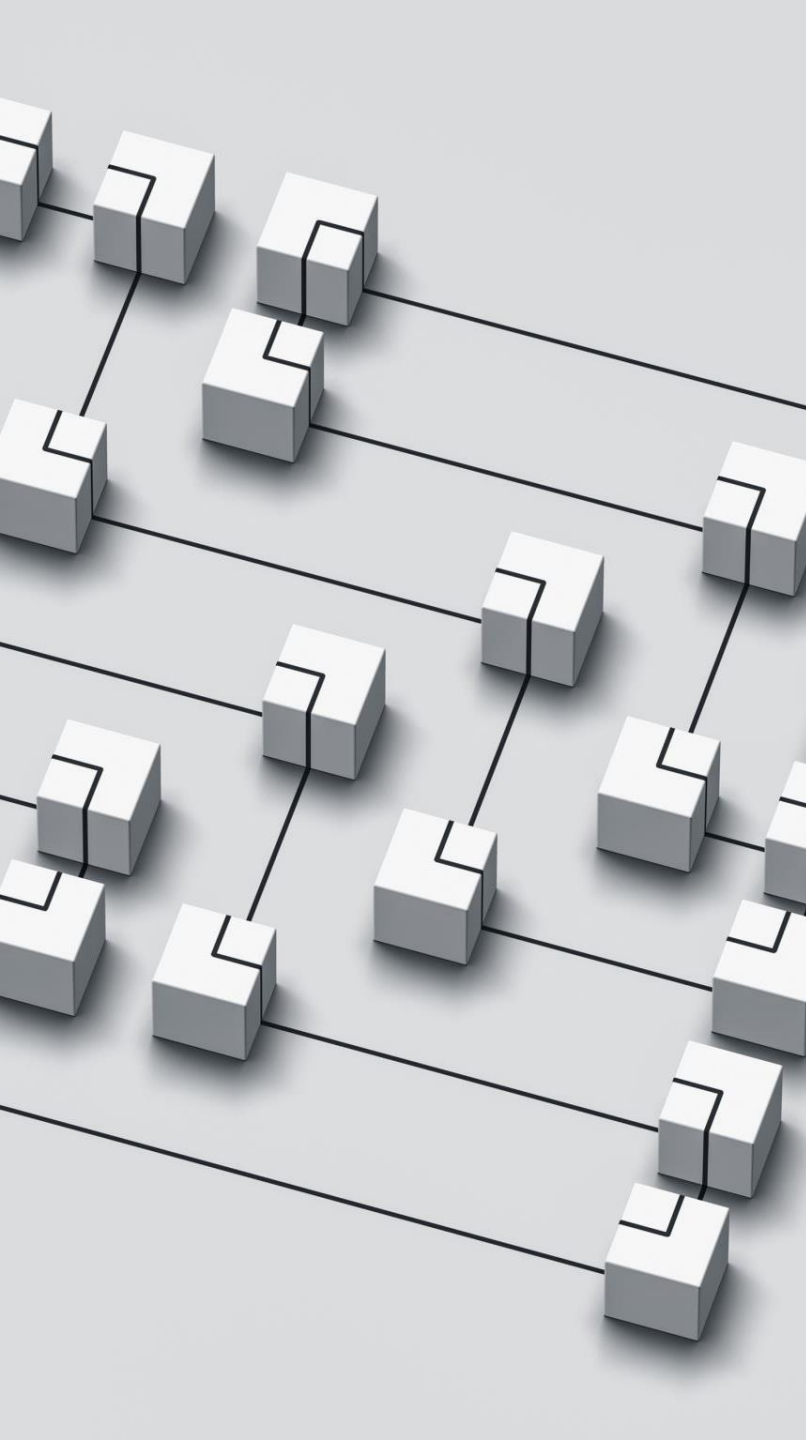

Data Engineering & Analytics

We design data warehouses, optimize databases, and create business intelligence solutions using Power BI & SQL Server.

AI & Generative AI

Developing AI-driven solutions with Microsoft AI, including predictive analytics, NLP, and intelligent automation.

Microsoft Products Implementation

Deploying and customizing SharePoint, Power Platform, and Microsoft Copilot for enhanced collaboration.

Staff Augmentation

Providing senior full-stack developers for IT projects with a flexible engagement model.

Managed Services

Comprehensive IT management, including infrastructure, security, and application maintenance.
