Essential Oils

Andean Mint - Muña

Produce from the distillation of leaves of a native bush cultivated in highland valleys of Peru. Its exotic aroma offers a combination of freshness and a warm sensation. This oil is excellent for cosmetic applications due to its ability to fight against free radicals.

Minthostachys mollis

Holy Wood - Palo Santo

Produced from the distillation of wood from the fallen tree. Its wood is considered as sacred by the prehispanic cultures that developed in the dry forest of the northern Peru. Used in fine perfumery, cosmetic industry and aromatherapy. It has a high content of limonene

Bursera graveolens

Peruvian Myrtle - Arrayan

Produced from the distillation of leaves of a native bush of the Andes, harvested sustainably by farmers. Used in cosmetics given its anti aging and antioxidant properties. The oil has a unique aroma with high content of limonene, eucalyptol and linalool.

Luma chequen

Oregano

Produced from the distillation of leaves from the southern Peru. This bush is exposed to a particular climate that gives the oil an attractive content of timol and carvacrol. Its properties make it very requested by different industries.

Origanum vulgare

Pink Pepper - Molle

Produced from the distillation of pink pepper seeds harvested in the inter-Andean valleys of Peru. This essential oil has a sweet and woody aroma. Used in perfumery and cosmetics. It has a high content of myrcene and α -phellandrene.

Schinus molle

Ginger

Produced from the distillation of roots cultivated by sustainable farmers of non-flooded regions of Peruvian forest. It has a warm, spicy, balsamic and woody aroma. Used in perfumery and personal care products.
