# Immersive and Collaborative Learning Environments In the Cloud

## About ASIRA

ASIRA is an ILMS - Immersive Learning Management System platform in the cloud to enhance collaborative teaching, immersive learning and research.

Developed on Sakai®, a project of the Apereo Foundation in the United States, it allows for the interaction and transfer of knowledge in friendly and high-performance environments.

## Our Service

MPL offers comprehensive services that allow customers around the world to implement eLearning 4.0 projects quickly and successfully. We'll work together with you, from planning, implementing, designing, supporting, integrating your content or ours to host all of them, to enhance your learning technology.

### Follow-up and support

For the content as well as for the participants. Understanding their particular needs and providing individual support tools. Understanding and improving their progress.

### Collaborative and immersive environments

A virtual or classroom course, a project, a program, a piece of research, a collaboration group and even a virtual or extended reality experience.

### From anywhere

On multiple devices, cell phones, tablets, PCs, virtual reality glasses, Windows cross-platforms, Android, iOS, to be connected everywhere at all times.

**Securely at every moment.** From the access itself, to the content knowledge bases, resources and data protection.

**Own models.** Because ASIRA is a framework for building tailored teaching models.

## XR Extended Reality solutions for adaptive learning

**01** Invenza is an immersive XR content design service implemented via a mobile app that authenticates with ASIRA.

**02** The App locates content according to the user's site and profile to be downloaded to the smartphone for offline execution.

**Industry Sector**  
Storage warehouses with sensitive areas can be explored in AR to show weight and dimension specifications.

### XR CONTENT

**AR** - Augmented Reality

**MR** - Mixed Reality

**VR** - Virtual Reality  
(Requires mpl VROOM)

**360°** Stereoscopic videos and images

**eLearning** Mobile Content

eDesign

## Rapid eLearning

Virtual eLearning content on your platform or ours.

FAST, CAPTIVATING and above all PRACTICAL, to improve performance at the workplace and people skills in a FUN and ENTERTAINING way.

## Let's build it

Our business and instructional design consultants work alongside your experts to design and produce dynamic, light, virtual content that uses our methodology to put knowledge into practice.

## Spanish For Schools

Rocín is a virtual program in the cloud for secondary schools to improve their Spanish as a foreign language experience.
