

VALVOTUBI IND

DIRECT FLOW

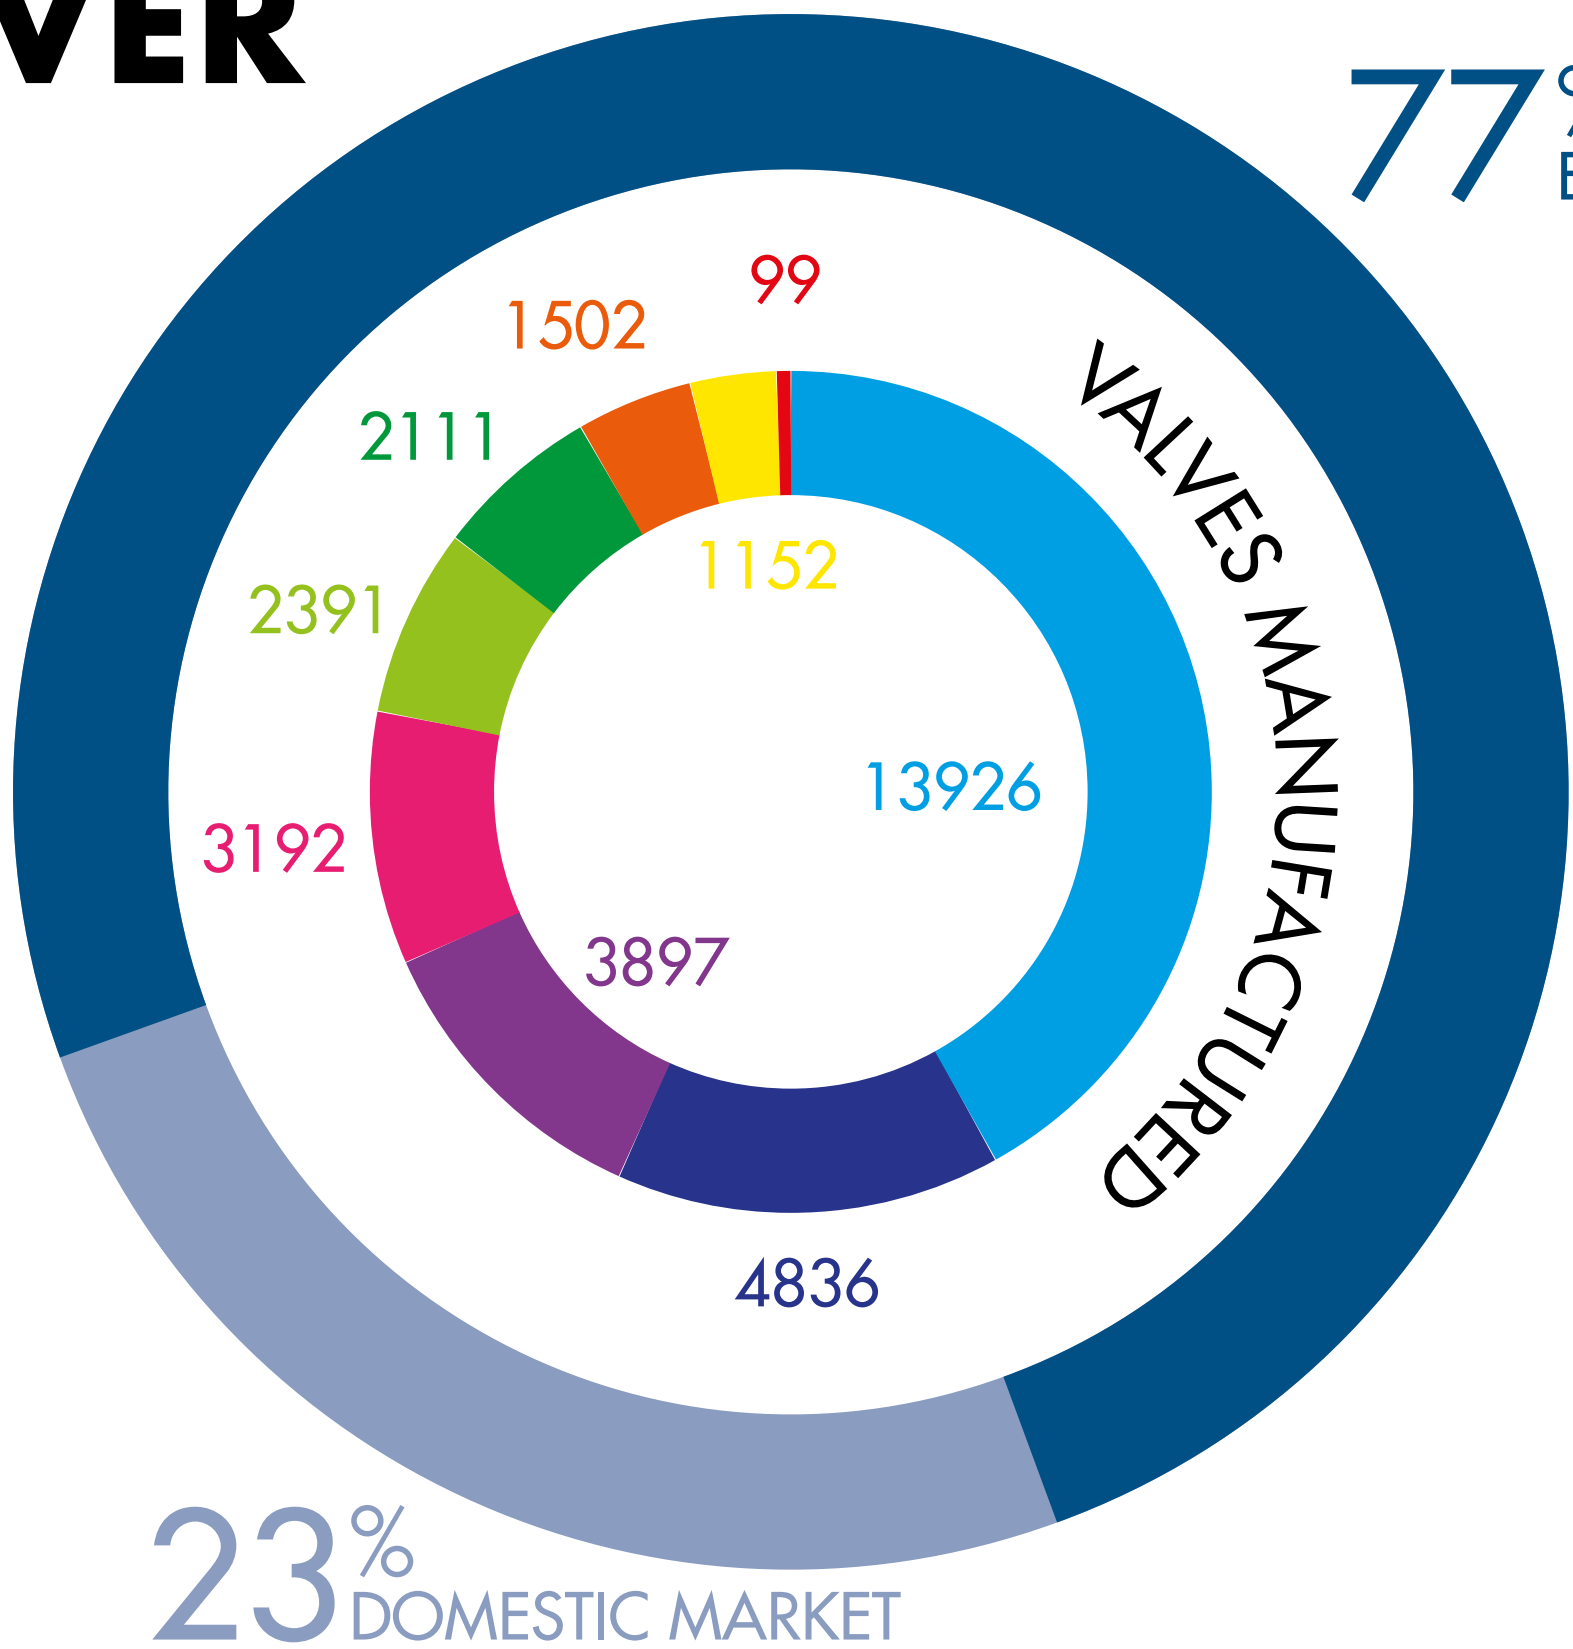

VALVOTUBI IS DIRECT FLOW

Since **1976** we have been producing valves for water and petrochemical plants with competence and particular attention to the environment.

From drinking water to treatment systems, from refineries to chemical plants, our valves are conceived for several types of plants and designed to meet any technical requirement. Thanks to a **ONE-STOP SHOP** approach and an **ON DEMAND** service, we can be a sole advisor for your projects, from start to finish.

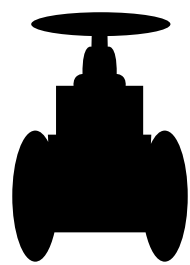

“DIRECT FLOW” is our approach: direct, quick, capable to find effective solutions to meet the requirements of our customers, always at their side.

Having a sole advisor, from design to delivery, means to save time,
resources and energy. That's why we chose to develop a

ONE-STOP SHOP approach.

Thanks to our over forty year

KNOW-HOW,

our customers may benefit from a complete consulting service.

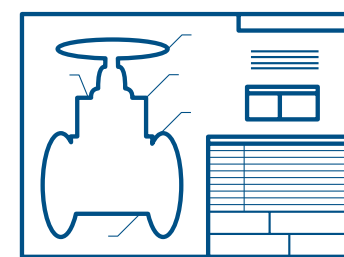

We assist customers step-by-step in choosing the most suitable products to the required application.
