WEKAH TECHNOLOGIES LTD. - company profile

Founded in 1981, **Wekah Technologies Ltd.**, a Veteran Industrial Company in Metal works and plastics, has expanded its activity in 2001 to Agriculture and Water Projects Consultancy and execution, using the long wide experience of its staff and affiliates in projects executed all over the globe. In addition, in 2012 the production lines converted to the Cleantech Sector in the field of Indoors gardening, under the Green-Oxygen Brand.

1.Agriculture Division- Wekahtech:

-The Activity and Services of Wekah Technologies Agriculture Division Ltd. are basically concentrated on Turn-key Projects, Farm Management, Rural Communities Development Projects involving Modern Farming, Marketing of Produce, and procurement of Inputs and systems. Special emphasis on water and irrigation.

- Under the vision of off, feeding a better world with prosperous farmers who can support their family with dignity and welfare, Wekah has developed the CCF – project, shared farming with the rural communities, (Community Commercial Farming) , which relies on a partnership with the small and medium farmers in order to cultivate and produce more yield and have higher Income in a sustainable way that benefits all parties involved.

- We believe that food security, increased production income and economy, will be done by empowerment of the farmers to produce in a profitable and sustainable way, with stable growth, rather than donation off free advice and inputs.

-Our Projects of Agrotechnology and Rural Development can be found in various location around the globe such as Colombia, Ecuador, Peru, Central America, East Africa, Angola, and India.

- Our Commitment to our partners successes and long-term vision of understanding their needs and continuous support and development is what makes us different and enables us to provide the optimum solutions for better economy and progress.

- We believe in people who believe in themselves and believe that we can prosper together.

- We believe in a world of farmers that are dedicated and well provided and guided.

- We believe that rural farming with the right organization and development is the solution to many problems of economic and social well fare, and changing the destination of countries and communities.

-Our professional capacity and experience allow us to adapt the projects and technology to changing environments and geographic locations.
